**SocialBox.Biz Campaign For Corporate IT Reuse to Drive Reduce Scope 3 Emissions**

London, UK - August 1, 2025 - SocialBox.Biz, a pioneering social enterprise, unveils its "Call Before Recycling Corporate IT" campaign, urging London businesses to donate reusable corporate computers before recycling old but still usable corporate computers to significantly reduce Scope 3 CO2 emissions, aligning with increasing corporate sustainability trends.

As companies face growing pressure to meet impact goals, reduce corporate Co2 and meet increasing reporting requirements, reusing IT equipment  is reducing disposal-related emissions.

SocialBox.Biz's secure, open-source reuse and donation platform simplifies participation. "Before recycling corporate computers, call us to reuse them," said the team at SocialBox.Biz. "This is addressing Scope 3 emissions and boosting corporate social impact."

Participants with ongoing significant contributions receive a CSR Impact Report, showcasing contributions to sustainability and community empowerment.
