**Performance Glass Processing are specialists
in Fire rated and Acoustic glass products,
as well as Decorative...**

Instructions for ordering

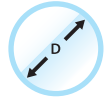

a) Squares and Rectangles

You can phone us with your height and width measurements *

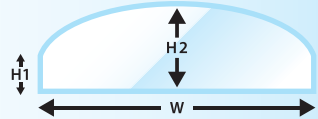

b) Circles

You can phone us with your overall diameter *

c) Arched Heads

You can phone us with both your height, and your width measurements *

d) Complex Shapes

Please bring in your existing glass, all pieces. We will assemble them and use them to form a shape and size for your new glass

e) Templates

Please use paper or cardboard to create your template. Remember to cut out the shape and trim it back to your exact glass size before giving it to us. You can post it, or bring it in person

It is always best to bring us your broken or damaged glass so we can assemble it here and cut a new piece to the exact size you need.

If measuring the glazing frame is your only option, you may need to consider whether radiused corners will be needed, and allow some clearance around your fixing screws.

All our ceramic glass will be supplied clean cut with regular corners unless specified otherwise.

We can accept payment in cash, or card, in person or over the phone.

* Remember to give us your size in millimetres wherever possible.
