Let Meso Vytal Get under your skin

- Stimulates natural collagen
- Improved appearance of wrinkles & fine lines
- Refreshes and rejuvenates
- Minimal trauma - maximum effect!

The most gentle ...
Most effective
Skin needling treatment available

Meso Vytal is a revolutionary skin needling programme that targets under the skin producing incredible results.

Serum which contains hyaluronic acid to rejuvenate and combat ageing, as well as a sophisticated composition of vitamins, Q10 and amino acids to supply the skin with essential nutrients and peptides to interrupt wrinkle formation are pushed into the skin and penetrate the intersection between the epidermis and the dermis. The highly effective ingredients target and repair the cause of visual skin surface problems.

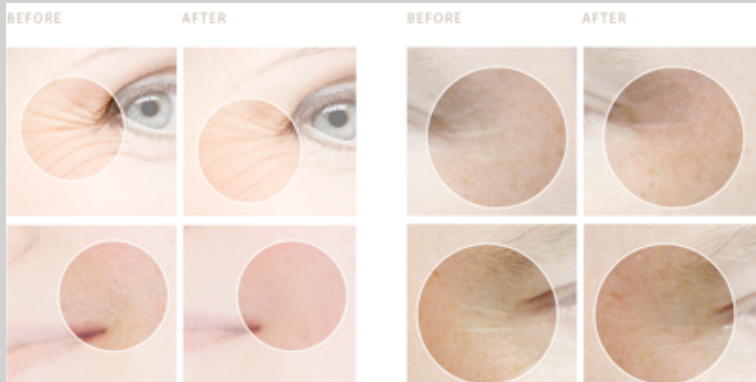

Most skin treatments use products which sit on the surface of the skin and less than 20% of these products will be absorbed. Meso Vytal works below the surface. The gentle needling of the skin also stimulates the skin's natural collagen production which results in a more plumped appearance.

Prices

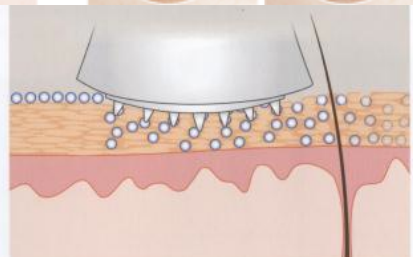

£40 Per Treatment
£100 Course of 3
