# Using OpenDNS to Block Adult Sites

There are loads of tools out there to block adult sites - here's how to secure your entire home network for free in under two minutes using OpenDNS.
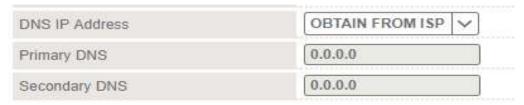

1. Put your router's IP address (usually 192.168.1.1) in the address bar of your internet browser.
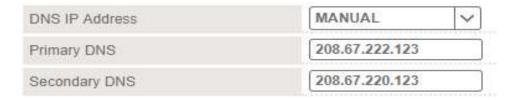

2. Log in with your admin account and password. This is usually different to your WiFi password.

3. Look for your DNS settings and take note of them in case you ever need to revert back.

DNS IP Address	OBTAIN FROM ISP
Primary DNS	0.0.0.0
Secondary DNS	0.0.0.0

4. Change the DNS settings to the OpenDNS IP addresses, 208.67.222.123 & 208.67.220.123.

DNS IP Address	MANUAL
Primary DNS	208.67.222.123
Secondary DNS	208.67.220.123

Job done. Your home network is now a bit safer thanks to the folk at https://www.opendns.com
