

Decopierre Stone Wall Coating
Your next stone wall in the bag!

Welcome to the world of Rock and Stone by **Decopierre**.

Over 20 years ago **Decopierre** was devised from old world materials with modern techniques to develop a breathable and bespoke lime based wall coating that offers unlimited style, colours and designs.

Today the group have trained artisan applicators in 8 countries and over 270,000 sq mtrs of walls transformed from drab to fab.

Here in the UK we have been rocking walls for over 8 years, and covered interior and exterior projects for private and corporate clients in all areas covering all styles of stone and brick.

Unlike other systems, Decopierre is spray applied, hand coloured and carved to simulate just about any stone and can include window cills, corner quoins, lintels and features.

The following pages are just an introduction to what is achievable and we would love to talk about your own project. Please visit the internet links at the bottom of this document for even more examples.

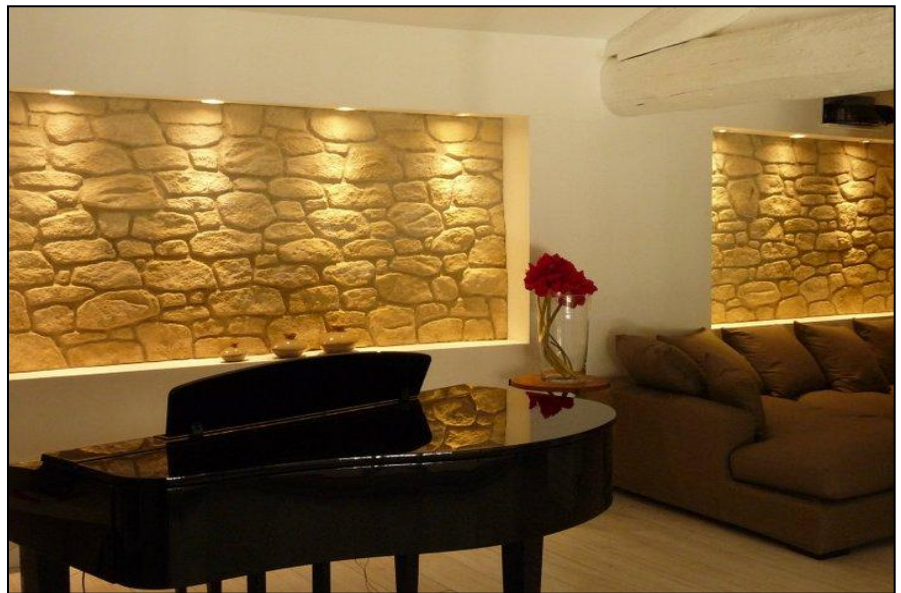

Why Decopierre? Lime based, breathable, bespoke, cost effective, light weight, adaptable, INTERIOR OR EXTERIOR. Weather proof. Planning and conservation friendly. Carbon Zero footprint. Design led and full supply and apply service across the country.

Decopierre GB Ltd: all information is copyright 2009. www.decopierre.co.uk

Interior feature walls in stone. Texture is back.

Decopierre can transform your interior walls to create traditional, rustic and classical surfaces to suit your home or business ideas.

Fireplace to feature wall, the style and shapes of the stones are all created into the wet surface and once dry, the Decopierre returns to its natural stone state. Look and feel is like stone as the product is real stone, reinvented.

Your ideas and designs included to the project and our experience is there to bring your dreams to life,

Exterior facades to change the look. New-build matching and area planning taking the walls back to the future.

Before and After the style chosen by the client to give a local stone look. Old stone + lime pointing. Random

From 1960's pebble dash to Cotswold sandstone, this million pound home was transformed. Over 600 sq mtrs the addition of lintels and feature lines created an old style that matched buildings in the Oxfordshire village of Long Hanborough.

Application over old render, pebble dash, failed bricks, new block or even wood and metal can be achieved with the right preparation. We have had planning and conservation projects passed and even Grade 1 Listed building renovation projects have used Decopierre in reconstruction. Any stone. Any wall, anywhere. Call us on 07941 813255 0161 374 9649 E: stonefxwalls@gmx.com

Corporate sector: Restaurants, Hotels, Retail.
 Stone is back en-vogue when looking for a designer styles and corporate identity,

Amorino worldwide gelato franchise uses Decopierre in all their outlets (6 in London) and with a non-maintenance surface enjoy the warmth and style of Italian stone in every shop.

Decopierre GB Ltd has completed all the UK shops and our European colleagues follow the rapid growth of Amorino across the globe.

www.amorino.com Islington, Charring X, Soho, Chelsea, Fulham, Oxford, Covent Garden.

Natural stone, random, with features.

Al Bosco Restaurant, Bury, Lancs

Working out of opening hours, this wall was white painted plaster. 2.5 days and we did the walls and added a staircase wall too. Stone building and now stone interior, the concept may soon include the bar.

Architects, Designers, Business owners. Use our system to create your corporate look. We travel throughout the UK and Europe, USA and a growing number of trained applicators and designers ready to complete your projects.

Plan your project.

The things we need to know:

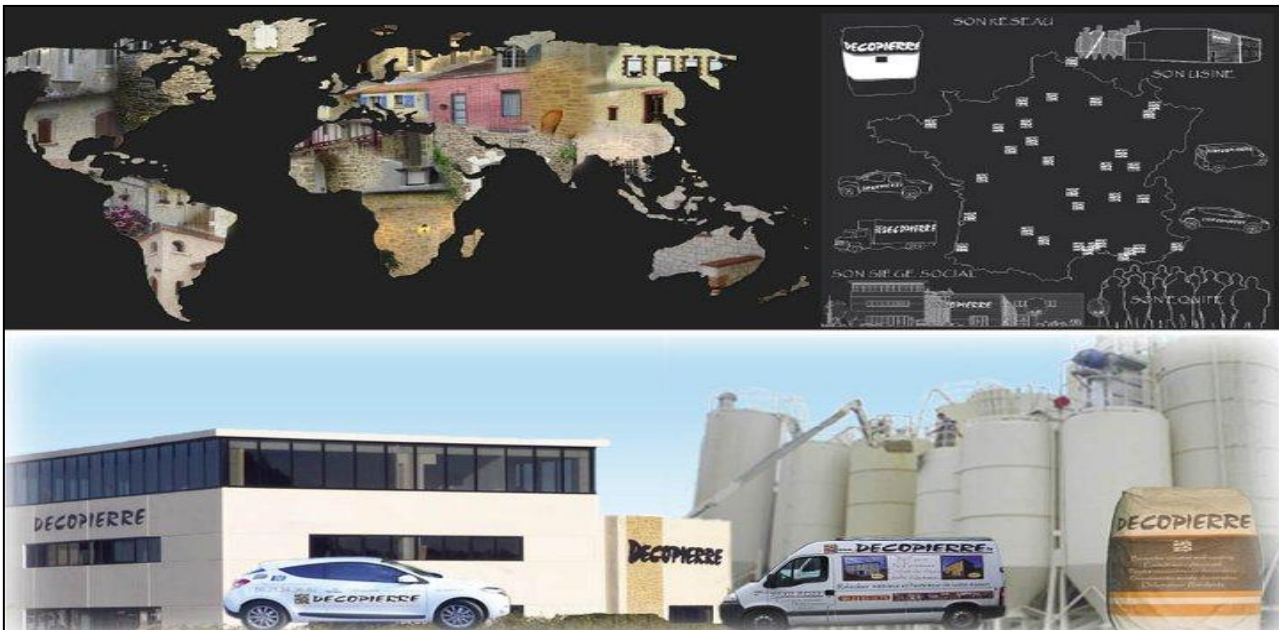

- 1) Post Code. Your location is important to us.
- 2) Contact Details. Lets talk. Email. Skype.
- 3) Interior or exterior walls.
- 4) Current wall material surface. (preparation needed).
- 5) Access, Height, room placement in property. Scaffold needed.
- 6) Style of finish you are considering. (Got pictures ?)
- 7) Size of the area. Square meters= amount of product needed.
- 8) Parking restrictions. (London and city projects).

We get asked every day to give '**Average**' prices, '**Ball park**', '**Approximate**' costs. The above list includes some of the requirements that make up a project. Some surfaces require NO preparation, some need undercoat, mesh, cleaning, repairs etc: To enable us to get your job right and create a wall to be proud of, we need to evaluate every job on merit. Recent work in London included over £200 or parking fees. A top floor apartment in an Edinburgh block had its own issues.

We are happy to offer free site visits, design meetings and can make up sample boards to suit your project (small refundable charge for bespoke sample boards).

Our system is unique to us and the Decopierre company in France manufacture many products for the building and surface coating industry. Unrivalled in the stone effect finish market, we pride ourselves in creating realistic and long term finishes for all arenas.

10 Year warranty. +100 year lifespan and reassuringly priced and cost effective when compared with quarried stone, slips or faux stone panels.
