

## Tooth Oil

### A Healthy Alternative to Toothpaste

Based on the Ayurvedic practice of Oil Pulling for  
Detoxification & Oral Hygiene

[www.dressupinyou.com](http://www.dressupinyou.com)

A tooth oil composed of optimised natural components. What's not to get excited about?

The tooth oil has scientifically proven beneficial effects on your teeth as well as strengthening the immune system due to **extracts of turmeric, lemon oil, and cinnamon leaf oil**.

The **silicic acid and birch sugar** help fortify and deep cleanse around tooth enamel as well as leave a refreshing **peppermint** after taste.

The **extracts of Babchi (a chinese medicinal plant)** help purify the blood and whiten the tooth.

It is important to keep the good bacteria happy, while killing the bad breath causing bacteria, this is why we have added **extracts of myrrh, sage, eucalyptus and clove**.

Finally, it has long lasting protection against gum bleeding and inflammation thanks to **organic sesame oil and green tea** (antibacterial / anti-inflammatory) and the antioxidant effects of **tocotrienols and tocopherols (Vitamin E)**
