HIRE, EARTH MOVING
AND CONSTRUCTION
NEEDS**

ABOUT US

World Impact Suppliers cc was founded by John Dauth in 2010, it is a proudly South African based company. We cater for all your plant hire, earthmoving and construction needs. We have an equipped workshop in Ladysmith where all of our equipment undergoes maintenance on a regular basis and is checked at the beginning of each day to ensure we can work before leaving to our customers thereby ensuring minimum downtime. Our experienced operators are trained with a valid operator certificate and driver's license and have PPE ensuring that they are fully capable of handling the equipment competently. Our Tlb has liability insurance should anything go wrong on site. We also have a technical back up assistance to attend to any problems that should arise on site, quickly and efficiently. We adhere to all industry standards of safety and regulations. We normally work within a 50km radius of Ladysmith KZN but we are more than willing to travel away from where we are needed.
