

THE SASH
WINDOW
WORKSHOP

Who We Are And What We Do

Welcome to The Sash Window Workshop.

The company was founded in 1994 by Richard Dollar and remains an independently run business based in Bracknell, Berkshire.

Set up to serve the needs of discerning owners of period properties, we started with 3 employees operating out of an old pig farm near Ascot, Berkshire.

Since those early years the company has gone from strength to strength. We are now based in purpose built workshops in Bracknell and the business employs a loyal and dedicated staff of over 75.

We pride ourselves on the fact that we manufacture all our windows and doors at our premises in Bracknell and keep all our work in house. We encourage prospective customers to visit us where they can meet our staff and take a guided tour.

How do we work? We are very much a “one stop shop”. We offer a full range of window and door replacement and repair services. We have experience working in a variety of period properties across London and the South, including Victorian, Edwardian and Georgian buildings.

New Joinery

All our replacement timber windows and doors are bespoke and made to suit your property. We can replicate your existing windows and doors and comply with conservation area and listed building requirements where necessary. We are proud to manufacture windows and doors that look as nice close-up as they do from a distance.

We offer a supply and install service across London and the South and a supply only service across the UK.

Sash Windows

Our sash window range includes fixed sash windows, spiral sash windows and cord hung sash windows.

If the frames are in a good condition, we also offer a new sashes into existing frames service, which replaces the moving parts of your window.

Casement Windows

We can manufacture a range of casement window styles, including flush casement windows, storm proof casement windows, traditional casement windows and modern designs of casement windows.

Similar to sash windows, if the frames are in a good condition we also offer new casement sashes into existing frames. This is not only cheaper than replacing the whole window, but also reduces disruption.

Timber Doors

Our external timber doors include multiple different styles and patterns of Front doors, back doors, French doors and Bi-Fold doors to suit your home.

Secondary Glazing

Secondary glazing is a popular choice for listed buildings, providing the benefits associated with double glazing, while retaining your existing windows.

Our secondary glazing is bespoke and designed to fit the configuration of your existing casement or sash windows.

Draught Proofing and Repair

Our draught proofing and repair service is designed to reduce draughts and rattles from your timber windows and doors, improving functionality, security and energy efficiency.

Guarantees and Accreditations

We are proud to be a Which? Trusted Trader and have a 5 star Trustpilot rating. We are also members of the Guild of Master Craftsmen, Wood Window Alliance and are FSC accredited and registered with FENSA.

Our new Accoya™ and hardwood windows and doors come with a 20 year workmanship guarantee, in addition to the 50 year anti-rot guarantee if they are made in Accoya™, our preferred timber. Our draught proofing and repair service comes with a 5 year guarantee.

Any Questions

If you have any questions you would like answered, please do not hesitate to ask your sales surveyor.
