Estimates

Estimates are generated from our client's requirements in terms of expertise and assessment of the expected time to undertake the project. We endeavour to be accurate with estimates. The exact time required to undertake each task involved in completing your project varies as each client has different requirements that are quantified at key points during the project. i.e. when a planning application is being submitted. If you have any concerns that your project will not fall within the estimate, please contact us for information on the current position. All prices are subject to V.A.T. at the present rate.
