

A New Pest Control Business In Leeds Has Received Great Reviews

July 26, 2019

UK based [Apex Pest Control - Leeds](#) is proud to announce that they have received two 5-Star reviews from delighted customers who visited their new Leeds office. Apex has been expanding so that they can serve more areas across West Yorkshire, providing services to residential, commercial, agricultural, and forestry customers.

Those seeking pest control services will be delighted to know that local technicians are available 7 days a week and do not charge for a call out. "Any pest can be a hazard, so we're here whenever our customers need us. We know that rodent problems, especially rats, are widespread across Leeds. We are here to help property owners eradicate them," stated Tony Johnson of Apex Pest Control - Leeds.

Clients of Apex Pest Control benefit from the peace of mind that comes from knowing that the company is a member of the National Pest Technicians Association (NPTA). The NPTA provides accreditation which guarantees the professionalism, conduct, and assurance that work is carried out to the highest standards. Janice Nicholson confirmed her satisfaction with the company's services in her 5-Star review, stating, "Highly recommend, would use again if required."

Finding a pest control company who is willing to come out whenever they are needed, and does not overcharge for services, may seem impossible. However, Apex Pest Control in Leeds provides on-line guides for their charges for rodent and insect pest control services, so customers can estimate their expenses even before they call. The company offers a comprehensive pest control service both for those in emergency situations or on-going pest control management and maintenance. Residents who spot ants or cockroaches should get their property investigated to make sure it does not become a health risk. Apex Pest Control can accommodate specific requirements, and they recommend that clients get in touch to obtain a tailored quotation. Learn more here: [Pest Control Leeds](#).

Through their Facebook page, Apex Pest Control provides an easy way for locals to stay up to date with current pest-related issues in the area. For instance, they recently discussed the bee swarms affecting some properties in the area. Apex Pest Control helped protect the bee swarms, gently collecting and returning them to local beekeepers. The company advises members of the community to call them immediately in the event a bee swarm is spotted. They are able to collect such swarms, which may include up to 20,000 bees, and find them a new hive in a safer location. "We invite all our customers, new and existing alike to leave their reviews on Google or Facebook," said Johnson.

Pete Hogg, another delighted customer, had this to say in his 5-Star review: "Excellent service from Apex Pest Control - Leeds. I was looking for a Leeds pest control company when I found Apex. I needed to get rid of rats at my property in Hyde Park. Tony and Tom give me a top service, and advice to stop the rodents. Fast and affordable, and I highly recommend them for pest control services." He went on to say, "I've used these guys a few times now in some student houses to remove bed bugs as well as mice. I found them honest and thorough, and they didn't charge us for a

call out.”

Johnson said, “As professionals, we know which treatment is best to use in any situation. We are dedicated to delivering complete customer service and satisfaction. This has enabled us to become a customer favourite in Sheffield, and we aim to become the local favourite in Leeds as well. We assess every pest problem on an individual basis. After we finish, we provide a report stating all the pest management and treatment we’ve done and provide advice for future pest control prevention.” The company provides a range of specific services across West Yorkshire to suit any need, from bird proofing to bee and wasp nest removal, as well as rodent removal required, from squirrels to moles and rats.
