Home cinema & audio specialists

Do you need a reliable and high performing AV receiver to meet your home cinema sound needs? Are you a home cinema beginner or enthusiast looking for the latest technology to build an ultra high-performance and high-sound experience? Then you must be looking for the best possible sound experience with a combination of uncompromising audio technology and versatile technical features all in a package. Denon AV receivers can be the perfect addition to your surround sound system as they are designed with the latest features and technology for surround sound to keep you entertained. Denon's AV receivers include the new Denon AVR X2200W AV Receiver, Denon AVR X3200W AV Receiver, Denon AVR X4200 AV Receiver, Denon AVR X7200WA AV Receiver and other new models that are capable of delivering the best sound performance for all home cinema systems. These audio visual receivers (AVR's) come with a series of built in features ranging from DTS-HD Master, DTS-X, Dolby ATMOS and Dolby True HD audio decoding to HDMI 2.0 and HDCP 2.2 format compatibility and pure color 4K ultra video pass through for superior viewing and sound effects. Additionally with the easy setup assistant option from Denon, you can personalize these Denon AV receivers according to your source input and speakers easily and quickly to make sure that you get the best sound performance.

It is the ultra-modern features and great performance abilities of Denon AV receivers that make them preferable for today's audio listeners. Though based on revolutionary surround sound technology, these A/V receivers are available at a reasonable price without compromising on sonic effect or visual quality. With at least seven channel output, you can expect these receivers to produce as much as 150 watts of high power for your home theatre cinema sound and music playing. Denon AV receivers have built in Bluetooth connectivity making it possible for you to wirelessly connect to portable devices and playback songs stored in them. They also have built-in Wi-Fi to connect immediately to your LAN or personal network. With Denon AV receivers you can not only hear a large range of radio channels but also enjoy playing music from online sites.
