In this HyperFund Global Review, we shall be discussing many of the most asked questions about this unique membership opportunity - from what is HyperFund Global? to who are the founders?, how it works, how to get started and more.

What is HyperFund Global?

HyperFund Global is a completely passive income opportunity which pays between 0.5% - 1.0% daily on your membership pack, until it has returned three times your cost.

Membership packages start at the equivalent of \$300, paid in USDT (ERC-20), and go up to \$1000, although you can buy as many as you like so there is no limit.

Once your daily rewards have reached \$50, you can withdraw or reinvest it to compound the returns.

[Crypto Trading for Beginners](#)

Today, crypto trading is the new avenue people take to invest or trade in the financial market. It involves trading on price movements based on financial derivative products, or buying and selling the coin itself via a cryptocurrency exchange such as Binance.

With metals such as silver and gold losing their allure, many investors believe cryptocurrencies as an alternative to secure their investment. Cryptocurrencies are digital currencies secured by cryptography, which makes it nearly impossible to create counterfeit copies, or to “double-spend” the coin. Most cryptocurrencies are based on blockchain, a type of distributed ledger technology that eliminates the need for an intermediary to process , validate, or authenticate transactions. To start your crypto trading journey, you need to have an online digital wallet, as this allows you to keep any cryptocurrency you buy, either from an online platform or from someone else. To begin trading, you will need to create an account on an excha... [READ MORE](#)

HyperTech Group Core Leaders

Jayden Wei: HyperTech Group CEO Jayden is an experienced fund manager with extensive experience and strong track record in technological investments from running his own start-up incubator as well as being in charge of Australia's first blockchain venture capital fund. His success lies in his deep passion for digital technology; he believes that blockchain technology will revolutionise the digital economy while also making considerable impact on the traditional economy which still faces issues regarding privacy,

transparency and efficiency.

In recent years, he is primarily involved in promoting wider and better use of technology across the world and has worked extensively with the government of Australia, United Kingdom and the Philippines amongst others. - CEO of HyperTech Group - Executive Director of CollinStar International - Star Crypto Investment Highlights include: - QTUM (19037% returns) - Aeternity (12400% returns) - OmiseGO (8047% returns) - Led the investment teams of ... What are Cryptocurrencies?

As the name implies, a cryptocurrency is a digital currency that is secured by cryptography. Cryptocurrencies leverage on the blockchain technology, and are generally not issued by any central authority.

The decentralized nature of cryptocurrencies mean that any government interference or manipulation is highly unlikely. Since the emergence of the first cryptocurrency, Bitcoin, in 2009, there have been significant changes to the financial market.

Today, there are thousands of alternate cryptocurrencies (also known as alt-coins, or alts) with various functions and specifications. Characteristics of Cryptocurrencies Some of the features of cryptocurrencies include: Trustless : Cryptocurrencies were designed so that you do not need a trusted third party like a bank or credit card company to function. Generally, most currencies preceding the advent of cryptocurrencies required the presence of a central authority for everyone to trust it before using it. In contrast, almost every segment of...
