

BESPOKE

Handrails & Staircases

by Anthony Clemens - 40 Years of Specialist Geometrical Handrail & Staircase Solutions

We design, manufacture and install all types of bespoke timber handrails and staircases, specialising geometrical staircases, wreathed and curved handrails.

Our services range from individual handrail wreaths to a complete stair/handrail solution to a range of customers including direct clients, joinery firms and main contractors.

We take pride in our quality and service for each client and project we take on.

BESPOKE *Handrails & Staircases*

Bespoke Design using 2D/3D CAD

In house designers and Professional Drawings with all necessary information for approval and controlling stair / building interfaces

Installation

Our team is experienced at installing all of our products, and we take pride in delivering to deadline

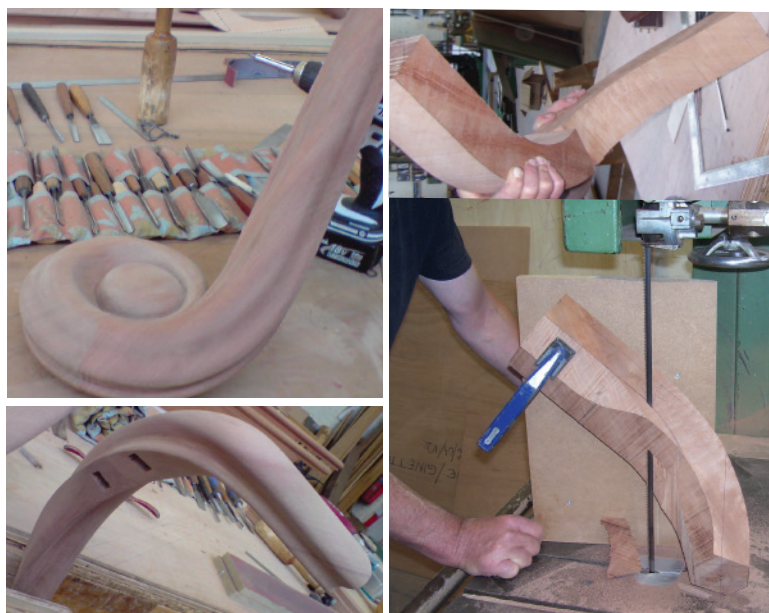

Finishing

We have number of finishers who specialise in French polishing, painting, oiling, waxing and lacquer.

Manufacture - Handrails

We are one of only a handful of joiners specialising in the design, set-out and construction of curved and wreathed handrails. We use a combination of traditional methods, CAD, joinery and hand carving to design and produce beautiful handrail solutions.

Manufacture - Staircases

We have >50 years of experience in building highest quality geometrical stairs. We can provide a solution to any type of timber staircase and can deliver a complete project with integrated handrail and balustrade design. We use a combination of techniques including keyed / staved / laminated strings, to suit each staircase.

Restoration

We are able to produce handrail, spindles newels and decorative features to match existing designs from a sample or photo and restore to its initial beauty. We can also restore cast iron balustrade.
