

Captivating Animation

Do you have a need to show your service, product, safety message or information to your team, employees, patients, public, potential customers or anyone that will benefit?

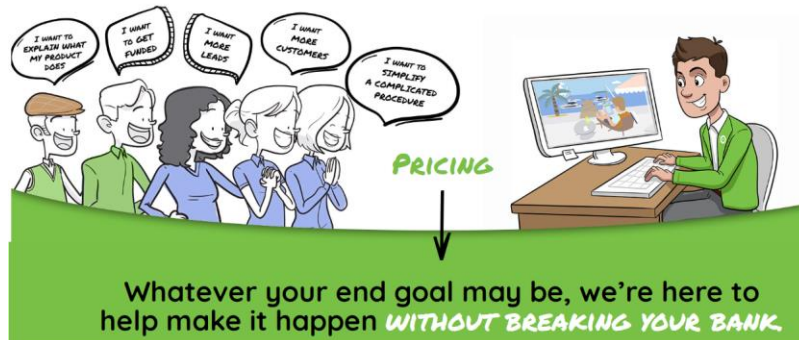

We have the answer!

A clip of information appears in an on-going and fascinating animation drawn by a hand onto a white board/glass: step-by-step!

Examples:

You tell us what you want to animate and we will draw it in quick-time. We can add music, voice-overs and different languages. Once the animator starts your animation, the chosen audience becomes captivated and your message is delivered in full and with fascinated interest – getting the message across.

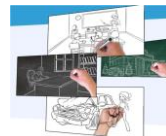

Who would benefit:

Doctors/Dentists Waiting Rooms, Employers, Shop Owners, Work-shops, Supermarkets, Safety Managers, Human Resources Directors, Government Offices, Church Officials, Colleges and many more organisations that want to get their messages across in a unique, attention-grabbing and fascinating way.

If you want to see an example, please write to the person below.
