

LEAN-TO

Changing the shape of conservatories

A traditional conservatory tends to be of a particular shape, rectangular. A Lean-To is an ideal alternative to tradition and adds a sleek and modern design to any home.

Whether opting for a downward slope or reverse lean-to the Atlas roof strength means you can span greater distances without the need for unsightly bolster bars, purlins or structure. It is the elegant solution due to its clear sightlines - 30% slimmer internal rafter, 70% slimmer internal ridge
