

Utility SCAPE

Multiple meter dashboard, utility meter monitoring.

Utility Scape offers you the ability to view multiple meters under “one-roof”. Utility Scape combines all your energy meters data regardless of their location.

Easy to use, cloud based software

that provides historic & current timeline views, multi-site and meter comparisons, reports & alerts.

Your meter(s) data can be easily viewed by kwh, cost per hour, day, week, month or custom periods, kwh/sqm or even carbon used. Data from all of your meters across your building portfolio can be seen and analysed in one place, which is easily accessible on the cloud.

minute data intervals

dashboard platform

multiple data sources

collects kWh, kVa data

Utility Scape takes data from any/all of your Utility Smart and Genius plans and makes it simple to **combine multiple energy types and meters in one comprehensive dashboard.**

Utility Scape helps you monitor your consumption so you can stop wasting energy and start making energy savings. It's a powerful weapon in your fight to reduce your energy and water consumption and costs.

Features

- As Utility Smart & Genius

plus...

- Multi-user and multi-utility
- Energy costs per meter
- Compare selected meters

Benefits

- Identify buildings that operate more efficiently than others.
- Learn best practices from well performing buildings.
- Staff buy-in to improved energy efficiency practices due to peer performance.

Prerequisites

If combining Utility Genius meters site internet access is required.

3G Router can be provided if internet access via site network is not possible.
