RELIABLE

Equipment

The digital DJ is much more compact and providing a high quality sound and light show with much less equipment than DJ's of old using vinyl and huge decks. All of our equipment is PAT (portable appliance tested) which is a growing requirement of many venues and guarantees that it is in safe working order.

Digital Music Library

We use a PC and market leading DJ software to play the songs and mix the beats. All of our tracks come from Groovespark which is a web based music streaming service that allows tracks to be stored and played via a computer with a valid license (via Virtual DJ's Content Unlimited service). This means the tracks we play are all tested and of high quality bit rate meaning you get the very best tracks with an almost limitless library (15,000,000 songs).

Speakers and PA

We use self-powered speakers with a capable output of 120dB. This saves us having to run extra wires and amplifiers and means if there is ever an issue (and by using high end equipment there practically never is) we can just life and drop replacements quickly. Our set up evolves so may be as small as 2 compact speakers for smaller events up to 6 speaker systems with bass cabinets for larger venues.

Lighting

Any event including a disco will come with an LED lighting rig. Modern LED lights are low energy and heat and are much more compact than previous stage lighting. A standard rig will include strobes, lasers, colour washes and moonflowers which will light the ceiling, dancefloor and walls with an array of effects and colours.

Rigging and Backup Equipment

We use compact DJ stands with trussing and speaker stands normally covered with star cloths and a back drop. We ensure our cabling is tidy and safe so the environment is safe for your guests. It's very rare that equipment does fail but we carry sufficient back up equipment to keep the party going.

Needed a DJ for a 10 hour stint of Disco and Karaoke with only 4 days' notice... I got a prompt reply an amazing quote and awesome service (not to mention a very happy boss). Definitely recommended, they do exactly what it says on the tin! Thanks Andy

**Wendy Corbet of Zynk Bar
Whitley Bay**

You're in Safe Hands

As a responsible company we've done our best to make sure while you're having fun you are doing so in a safe environment and we're not putting you or your guests at risk. As you can imagine mixing alcohol, vigorous movement, with sharps and wet floors is a recipe for disaster. It will be reassuring to know that your DJ has done his part in making the stage as safe a place as it can be.

Public Liability Insurance

Our membership of ampDJ provides us with PLI cover of up to £10 Million per claim via Royal Sun Alliance. Our certificate is always available to view from the website and the DJ at your event will have a copy with them.

Method Statement

We are happy to provide our clients and the establishment where we work with a health and safety method statement to demonstrate that we work to safe practices in our set-up, breakdown and operations. This document contains a full risk assessment and the step we take to make the DJ area safe and tidy.

Experience

Our DJs have been working in the entertainment industry for many years in a number of roles. This means we were familiar with most of the pubs and clubs around the Tyne and Wear region. We worked at some of the biggest venues like the Gateshead Hilton, Newcastle Sandman Signature, Newton Hall, Bamburgh Castle and Otterburn hall to name a few.

Thanks Andy for our marquee disco at Bamburgh Castle in July. Some easy listening for the foodie part and then some serious shape throwing tunes for the disco. Thumbs up!

Donna Allinson - Bride

Wedding DJ
north east

Wedding Receptions

Wedding DJ North East is our bespoke service for your big day. We'd love to be part of the celebrations and help to make your dreams come true.

As well as offering a full disco for the evening party we can help out with a PA system for the speeches, supply music for during the wedding breakfast or during the reception.

When it comes to music we will work with you on the first dance and have from time to time allowed friends or family to sing the wedding dance. If your stuck we can help with ideas or look for rare versions of songs.

We can also use our extensive network to provide additional services such as a party photographer or photo booth, illuminated lettering or star lit dance floors.

Magic Mic Karaoke Nights is a branch of Attack the Dance Floor focussing on providing Karaoke and Karaoke Discos as a specialty. We boast one of the best karaoke services around.

To make you sound like the stars we provide high quality radio mics, voice effects for delay and reverb and a huge selection of tracks from all the best suppliers so we should always have your favourite songs to sing.

The Magic Mic karaoke is used by amateurs and professionals alike and the host is always happy to sing a few tracks to get things started.

We're also looking for clubs and bars who are interested in a resident Karaoke and have experience of working in busy City Centre establishments.

We can do karaoke for the kids too so if your planning a birthday party and have a child who loves to sing, we can get them up on the stage and on the path to becoming a pop star.

MAGIC MIC Karaoke Night

Thanks for doing our Karaoke Christmas Party... Was an excellent night, would definitely recommend and won't bother looking elsewhere if we have another party :)
