What We Are Telling You About Here Is Unique, Unconventional & Revolutionary

We're going to give you a sneak-peak at a system that involves selling products online, but not in a way that you would have likely seen before.

It's simple, fast, effective and we firmly believe that literally anyone, regardless of experience, can achieve incredible results in a staggeringly short amount of time.

Most importantly, it does not involve any of the intense frustration and drawbacks that you may have experienced before.

In short, this is the perfect MASTERPLAN to build a successful online eCommerce business that makes a lot of money.

What is The Kibo Code?

The Kibo Code is a training program over an 8-Week period that shows people how to make money using a very unique style of eCommerce that the creators have made MILLIONS of dollars with over the past couple of years completely "under the radar".

What makes the Kibo Code method different from other e-commerce methods is that it is MUCH faster and easier for people to implement, even if they have no previous experience. There is No Amazon, No Facebook, No Inventory, No Shipping.

The method is based on a model a famous brick & mortar store in Toyko, Japan uses to make BILLIONS of dollars every year selling literally every single type of product you can imagine.

They fill their store up with products, see what sells, but the best-selling products in more visible places to their (foot) traffic, remove what does not sell, then continue to add new products, remove, replace and optimize others, in order to maximize their conversions and increase their profits.

The authors of the Kibo Code training have been doing this for the past 2 years to make an absolute fortune online and up until now has been completely "under the radar".

This Kibo Code strategy is different. It's easy to do and literally, anyone can make money with this method.

The Kibo Code Benefits and Features

♥ You don't need to worry about product stock

♥ You don't require to involve Amazon

♥ You don't need to work with warehouses or international suppliers

♥ Neither do you need to run Facebook Advertisements

How Does The Kibo Code Work? How Can You Use The Kibo Code?

♠ You buy a high-quality generic domain name (you'll get a tool which finds good ones)

♠ You set up a simple store with a preloaded high-converting theme (which with the Kibo Code system, takes literally 60 seconds)

♠ You pinpoint profitable products using our software (from a selection of about 3 Million items). The niche or market is not the focus - it's the profitability of the products that we're interested in.

♠ You load up the website with these product listing (no image or text creation required)

♠ You send instant traffic to the product listings using cheap, underrated and vastly untapped methods.

♠ When sales are made, OTHER USA-based suppliers' drop ship the products to the customer directly (you never touch ANY inventory or buy anything upfront and the products get delivered FAST)

♠ You will be shown how to optimize, keeping the profitable products, eliminating the ones that aren't, then keep on scaling up, replicating the process over and over to identify additional winning products, whilst simultaneously increasing profits.

Of course, there are some additional elements too, however, this is the basic process.

The Kibo Code customers will receive, training, software, proven storefront and product pages, product databases and identification tools, a control center, coaching, support, community and a whole lot more to make this as easy as humanly possible.

And just to reiterate, everything that you will receive is proven and tested. The creators have generated millions using the exact system that you will get.

About The Kibo Code Creators

The creators are **Aidan Booth And Steve Clayton**, both seasoned online marketers and eCom experts.

Aidan began his journey into the internet world almost accidentally. With his wife, they rapidly moved to Argentina although he didn't know how to speak Spanish, which main reason to have his first practical experience with digital marketing in 2005.

By 2006 rolled around, he felt more experienced about working in the digital world, and he was able to set up several basic affiliate websites, delivering traffic to them using Google AdWords. Although his

commissions weren't significant, he discovered a new way to make money.

At some point, he began to move the attention elsewhere, shifting away from affiliate site with paid traffic, to a blend of eCommerce and affiliate sites created to generate the most out of Google traffic.

If we fast forward, his business has transformed entirely to what it was a few years ago in 2005. He partnered with Tim Godfrey and **Steve Clayton** and he was only a third-owner of his company. Clayton kicked off as the CFO for a Fortune 500 company, so he truly knew what he was doing with his fantastic planning solutions.

Before he got involved with new partners, he was aware of how important it was to diversify his business, but he never created a structured plan on how he'd go about doing it. That was the first thing to improve in his new company, and it made a huge difference.

Benefits of The Kibo Code

The 7 Huge Benefits That Set This Apart From Anything Else Out There

#1: No Traffic Issues As you know, traffic is the life-blood of any online business and unless you are able to generate targeted traffic you won't make any money.

The good news here is that we use untapped sources of high-targeted buyer traffic where you can place the products you are selling directly in front of people who are online, looking to buy them right at that moment (WITHOUT using Facebook).

#2: No Supplier Headaches If you run (or have tried to run) an eCommerce business that sources products from China or other overseas countries, you'll know first-hand that dealing with people over there can sometimes be difficult.

One simple communication breakdown can result in thousands of dollars down the drain and lost business.

We don't do that here. We only source products from US suppliers and to begin with we only sell these products to …
