

# The Level 5 Diploma in Leadership in Health, Social Care and Children and Young People's Services

## Programme Outline

The level 5 Diploma is the recommended qualification for managers and senior practitioners in the Health, Social and Children and Young People's Services sector. The qualification is designed to give you the skills and knowledge you require to work in a senior or management role and offers a range of subject areas appropriate to your own particular role.

You have a choice of pathways for which there are mandatory units such as developing professional development, risk management, safeguarding, communication, leading and managing a team, developing supervision practice, assessing the individual in a care setting and others.

The teaching and learning of the Diploma is by way of mentoring, group discussion, observation and practising in the workplace, as well as classroom based learning. You will use real world problem solving, engagement in everyday work activities, reflective practice, assignments, questioning and feedback to develop your skills and knowledge. This will help to identify issues that are relevant to your own professional performance and development and help you achieve the qualification.

The qualification is funded through Higher (Adult) Apprenticeships.

## Duration

1 - 2 Years

## Cost

Free for those eligible
