# Summer school

For International Language Homestays

**Our International Summer school takes place from the end of June to the middle of August each year at a fun location close to Brighton. Find out more about our Brighton English language centre**

Students of different nationalities are placed with students of a different mother tongue in our Host Families to ensure that they further develop their English language skills while they are in England.

Each week is packed with lessons and a full range of activities and excursions. Sundays are spent with the Host Family so the student gets to experience the English culture and traditional English way of life.

For our Summer school students, we have family homestay accommodation based around the Brighton area including Hove, Shoreham by Sea, Worthing, Lancing and Steyning.

We offer a good variation of afternoon activities together with one evening activity per week either an evening at the Brighton Pier funfair or a disco evening where students from our school can integrate with students of other language schools. The venue is prepared especially for the underage students and guardians are there to look after their health and safety during the party. Please note that on all excursions and activities groups are always accompanied by ELH activity leader in a ratio of minimum 1:10.

Most European students would come and study “free” at a State School. At an English State School you need to study until you are at least 18. You can not leave full time education before this time. There are many excellent state schools so do not think that because you are not paying, that the school education system is inferior. This is simply not true! If students stay on until they are 18 it is usually because they take A levels – Advanced Levels and want to attend University. Otherwise they look for a job or go to vocational colleges.

Your High School in England will be one looked after by the UK Education Authorities so you know that they will follow an agreed and recognised curriculum. They will have standards and performances to meet and this ensures that the school in England you study in, fits all the right criteria to help you progress in English. Lessons will include all of the important subjects such as English, Mathematics, Science, History, Geography, Foreign Languages and of course Sport, Music, Drama and “cooking” for fun.
