

OUR DOORS

The Italia Collection

This is a luxurious range of doors that's been inspired by the Italian passion for design and style. There are 19 exclusive designs with German made contemporary handles and accessories, which emphasize the sheer quality of the doors. Composite doors never looked so good.

The Conway Range

A sympathetically styled door suited for either a traditional property or modern home. It can be designed as a completely solid door, or with just some elements glazed. The choice is yours.

The Beeston Range

This is a great and popular choice for either front or back door and is the most common option for a stable door. You can choose from a vibrant colour such as red or go with a traditional timber effect finish, which is popular on a tongue and groove Flint base.

The Windsor Range

A great design that's perfect for either the traditional or contemporary inspired home. Consider modern chrome handles, antique handles and door knockers and 18 colours inside and out.

The Harlech Range

For properties with gable end features this is a very popular choice, particularly where there is a modern pitched porch. A white frame with a black door is a particularly striking option.

The Ludlow Range

Based on a traditional door design, this is probably our most popular style of door and with good reason. There are numerous colours to choose from and over 40 glass designs.

The Nottingham Range

If it's a door with traditional arched features that you are seeking, then look no further. This is a unique design that can be tailored for an old style door or for even a fresh design through the glass and colour options.

The Thornbury Range

This is a subtly grained door that makes an understated yet classical entrance to the home. Chose a pastel shade such as cream, Chartwell Green or even Duck Egg blue.

The Stafford Range

This is another option for those consumers looking for a door with an arched feature. The single arch emphasizes the type of glass from the traditional Diamond Lead to the detailed Royale.

The Tenby Range

A timeless classic of a design which can compliment any home as a solid or glazed option. Have a look at Irish Oak with an antique handle or go modern with bold colour and choice of glass design.

The Flint Cottage Range

When it comes to a door that's inspired by the country that you are looking for, then look no further. This is a perfect option for cottages, farmhouses and side doors. It's also a great choice as a stable door.

Composite French Doors

All of our door designs are available as double or French Doors, in all 18 colours. If you are a style savvy homeowner then forget typical PVCu French Doors, as a Solidor option can look quite exquisite.

Composite Stable Doors

These are as stunning as they are practical. All of our standard and many of our Italia Collection door styles can be integrated into a stable door and you can even benefit from different colours inside and out.

Side Panels

We can also offer matching side panels from our full

WHY CHOOSE SOLIDOR?

Put simply, Solidor make the very finest composite doors in the market today, packed with features and market firsts that aren't available on any other door on the market. Unique colours, exclusive high security hardware and beautiful features are just some of the reasons why high quality installation companies offer our products, while homeowners demand them.

We continue to invest in new materials and in a product development programme to ensure we stay ahead of the pack. We also offer the market's most comprehensive environmental policy, we've called it our 'Green Promise'.

Wherever you are in the UK, there's a Solidor installer that can help transform your front door into a stylish and stunning entrance to your home. Solidor, ask for it by name.

- 18 colours inside and out
- Unique 48mm solid core door
- Chamfered or sculptured door frames
- Exclusive door furniture

GUARANTEE

Our guarantee is overwhelmingly comprehensive and is impressive like our unique and beautiful doors. We use only the finest materials, hardware and accessories on our doors, so we know every door that we manufacture will look wonderful for many years. To keep your door looking at its best simply wipe down the door with a soft, damp, lint free cloth using mild, warm soapy water.

You should also help to keep your door furniture looking fantastic by polishing the handle and letter plate with a regular furniture polish or similar once a month. Finally lubricate the working parts of the locking mechanism once a year.

Our doors and door frames, along with the glass, come with a 10 year guarantee, our high security locking systems offer a 10 year guarantee, while our Prolinea letter plates and handles carry a full 2 year guarantee. In addition, our Rim latches and door knockers carry a 12 month guarantee.

Overall, we offer some of the most comprehensive guarantees in the door market. It's also impressive to note that our product testing has shown that our doors have a life expectancy in excess of 25 years.

SPECIFICATION

Specify a Solidor product today for the very best in quality, design and lasting performance. If you're unsure, ask for it by name.

The specification of our doors is unmatched in the composite door market, thanks to the unique solid timber core construction of our doors and exclusive trading agreements with specialist partners for door furniture and hardware. Our 48mm deep doors are also 10% thicker than our nearest competitors, helping making them more secure and energy efficient.

We can offer 256 door colour combinations through the option of 18 colours on either side. These range from contemporary colours to luxurious and life like woodgrains. We can also offer both a chamfered and a sculptured door frame and these are also available in 18 colour combinations. We believe that you should only be limited by your imagination when it comes to a beautiful composite door.

Our doors are also highly secure, thanks to our unique Avantis lock which carries the industry's largest dead bolt. We also offer other high security locking mechanisms for French Doors, stable doors and have just launched the latest AV2 lock, which replicates the appearance of a traditional key operated rim locks on period doors, yet features high security multi-point locking.

Our Solidor products are also some of the most environmentally-friendly in the sector under our 'Green Promise' to the environment.

Energy Efficient Reinforcing

Each door is manufactured using 100% fully recycled door frame reinforcing. As well as superior thermal performance Werbar is also super environmentally-friendly and out performs steel and aluminium when it comes to screw retention.

COLOURS

Enhance your Solidor door with a dash of colour or a luxurious woodgrain finish and create something truly individual.

At Solidor we offer the market's largest range of colours and finishes and can even offer you the option of a different colour inside and out. While most of our competitors are limited with choice, we've developed a colour range worthy of any home.

Our doors are available in 18 colours inside and out including market firsts, Chartwell Green, Duck Egg Blue, Irish Oak and NEW Mocha, Aubergine, Painswick Green and French Grey. Add to this the options of Black, Grey, Cream, Blue, Red, Green, Foiled White, White, Rosewood, Golden Oak and Schwarz Braun and you have 256 colour combinations to choose from!

We can also offer the widest range of door frames in Chartwell Green, Irish Oak, Golden Oak, Rosewood, Anthracite Grey, Schwarz Braun, White, Foiled White and Cream. You could even consider opting for a contrasting frame colour.

We believe that whatever your home or building, you should embrace the stunning colour options that only Solidor can offer.

SECURITY

It's reassuring to know that our composite doors are arguably the most secure in the market, featuring insurance and Police approved locking systems.

- Avantis Lock

The Avantis Lock is exclusive to Solidor and was recently subject to the very highest testing procedures at a UKAS accredited Test Centre. According to the testing house at Mila it was 'the strongest composite door yet tested' thanks to the hardware and the fact that the Solidor slab is a solid timber core, rather than a foam filled GRP door that other manufacturers use. This new lock provides the largest and strongest hook and bolt system in the door sector. Like many features from Solidor, this new locking mechanism carries the market's first 25mm triangulated dead bolt, which makes for greater compression and security on a closed door. Another key feature is the deadlock, which also operates from the action of lifting the handle, rather than a key turn.

The Avantis lock easily passed PAS 24 for security, which requires that the lock can sustain a manual attack for three minutes. In fact after two men had attacked the door for five minutes, they gave up to test the Solidor hinge, which also comfortably exceeded the required specification. Look at our video to see for yourself just how secure our doors are. Solidor can boast that not only are their doors some of the most secure in the market, they are also some of the most innovative!

- Yale Keyfree

In modern society we have replaced keys with other methods of entrance, such as remote locking on cars and now this can be incorporated into your Solidor door. Keyfree is the very latest in door security from Yale, a world-renowned specialist in locks and this product combines peace of mind with convenience by allowing you to access and protect your property without a key. You can use the remote control like your car, or enter your own 4-12 digit code into the built-in keypage.

Yale Keyfree couldn't be easier to use and because it's brought to you by Yale, you know its technology you can trust. Keyfree also harnesses a 3 hook Masterlock for exceptional security. With Yale Keyfree everything's covered. The unit is powered by it's own batteries, so even if the power fails it still works. It's also backed up an override key for emergencies and unless you ask it not to, will even talk to you as you use it. Go on go Keyfree with your Solidor composite door, you'll be the envy of your neighbours!

- Key Wind Up

Our Key Wind Up locking systems are used on doors where there is no locking handle, but traditional pull door furniture. Typical Edwardian and Georgian period doors had large pull handles and knobs and also our luxurious Italia Collection features the Key Wind Up locks, to enable the introduction of some very striking contemporary door handles. We also incorporate Key Wind Up locking when our traditional hand made antique door furniture is specified. Behind the Key Wind Up lock is an STV Cobra 2 mechanism, which is tested in accordance with DIN18103 (burglar resistant doors) and approved by major UK insurance companies. The deadbolt and hooks are thrown by turning the key and it also features a secure locking mechanism using sintered metal gears, which ensures a long service life. The STV Cobra 2 has been tested in accordance with PAS23 & PAS24 standards and the deadbolt can withstand in excess of 4.5kN end load, to comply with the additional Police 'Secured by Design' initiative. Reliability is provided by the fact that it has been endurance tested to 100,000 cycles and 30,000 cycles under load.

SECURITY

It's reassuring to know that our composite doors are arguably the most secure in the market, featuring insurance and Police approved locking systems.

- Keyless Digital Lock

Do you sometimes wish you could leave your house without having to take keys with you?

With the new Yale Keyless Digital lock you can do just that! The touch screen pad gives you an easy and convenient way of opening your door.

There's NO Keys, NO Hassle, NO fuss all you have to do is remember your own unique pin number. You can even create a temporary code to give other people access to your home when you want to, this code can then easily be deleted without having to worry about collecting keys or changing locks.

The Yale Keyless Digital lock is secured by a mechanical nightlatch located on the inside of the door with a battery pack containing 4xAA batteries.

Unlock your door up to 10,000 times with one set of 4xAA batteries. If the batteries reach a critical level a warning light will illuminate reminding you to change the batteries.

In the event of your battery going flat you have two battery contact points enabling you to fit a 9V battery to power the lock temporarily to enter your pin and gain access.

For additional convenience, the lock has a memory feature so that you do not need to reprogram your PIN numbers when changing batteries.

- Heritage AV2

As you would expect from a pioneer in the composite door market, we've pulled off yet another first in the door market with the introduction of the AV2 Heritage Door Lock. This new lock satisfies the need for traditional looking rim latches on composite doors, yet with the benefit of high security, multipoint locking. The AV2 is seen as an upgrade from the standard Key Wind Up and traditional rim lock used on our doors. Up until now, modern multi-point locking systems haven't lent themselves to doors that feature pull door furniture, particularly Georgian and Edwardian period doors and it has been a topic of discussion for the composite door sector.

The AV2 Heritage Locking System has the euro profile locking cylinder at a similar height to a traditional round cylinder and the lock is operated automatically as soon as the door is closed. This key feature means that an external lever handle is not required to operate the locking points and the lock can be deadlocked or opened externally by turning the key a quarter of a turn. From the inside, the door can be opened by an internal thumb turn, again with a quarter turn. The door is automatically locked when closed from the inside or outside and the key is then required to gain entry from the outside. The AV2 has been engineered and manufactured in Germany as a quality product and is Police Secured by Design and PAS23/24 accredited.

- Security Upgrades

There are a number of additional security upgrades available throughout the standard Solidor range to offer truly unsurpassed levels of security. These include the Pro Secure handles from Mila, the Avantis Cylinder Guard and the Yale Cylinder. The ProSecure door handle features security protection burglars can see and patented reinforcement technology that they can't. The ProSecure door handle is manufactured from a strong zinc alloy and has a wealth of features to provide enhanced security and visible protection.

It's also Secured by Design approved and the Police Preferred Specification logo is engraved onto the handle to act as a visual deterrent. The Yale high security cylinder boasts a wealth of features including anti bump and anti snap technologies and is drill, pick, force, tamper, torque, and saw resistant. It's also corrosion and fire resistant and is backed with a lifetime warranty. The Yale cylinder has been tested to the highest grade of BS EN 1303 for security achieving the maximum resistance to physical attack. This is a great and worthy upgrade.
