HISTORY

In 2016, Gion and his family were affected by a bed bug infection. At that time, they were desperate and didn't know what to do.
They searched for a pest control company, but that company took their money without doing an effective treatment. They asked for references and called someone else who did manage to help.

Gion:
"I remember that moment when I asked the guy (Heera) how his job was, because I was really interested in learning and dedicating myself to this."

Heera:
"If you want, start working for a big company and later, you can start building your own company, like I did."

The process was something of the sort, but much more complex than it sounds.
Heera helped Jony build **Huntsman Pest Control**, and now and since then, it has grown into what it is today.

OUR DIFFERENTIATION

Large pest control companies based in London that are well-known at a global scale, have grown to the extent that they cannot offer the best quality and approach to all of their clients. This is why their client feedback rating has an average of only **4.2**.

One of the greatest advantages Huntsman Pest Control offers its clients is the continuous hard work to **reinvent** ourselves and **improve** the current pest control business model.

Knowing the weak point of our competitors, we have **developed strategies based on the needs of our clients**, which is something other companies do not offer. These include the following:

- **100% effective results** or get your money back. We are the only company in the pest control industry that is able to **guarantee** results or provide refunds.

- **24-hour emergency availability.** We understand very well that in our line of work, we have to be very **fast and effective** to attend the emergencies of our clients. This is one of the reasons why our client rating is above **4.8*** in Google and have over **200** ratings of **5/5 stars**.

We select our **potential elite clients based on research done well before making a collaboration offer**. If the results show that they comply with our values and our beliefs, we offer them the possibility of working with us for a **free trial period without any charge.**

We fully trust our **quality of work**, which is why we are the only pest control company that offers its clients this kind of collaboration.
