Purr-fectly happy pet care will tailor our services to you and your fur babies. Each visit will be for a minimum of 30 minutes but we can visit for an hour or more, whatever your pet needs. We will also perform a mini health check at each visit, to ensure your rabbit(s) is happy and healthy. As a registered veterinary nurse Heather has the knowledge and experience in performing routine health checks on several different species. Let your mind be at ease with the knowledge that your pet will be well looked after.

We would recommend a morning and evening visit to give your rabbits fresh food, fresh water, clean litter tray, fresh bedding, let in/out for exercise, & most importantly a cwtch and play. We suggest keeping their daily routine to as normal as possible, therefore if they have access outside then we would be happy to allow this, under supervision, with the owners' permission.

We will keep the home environment clean and suitable for the rabbit(s) to enjoy whilst you are away. We can open/close curtains, switch lights on/off, collect mail and put the bins out as required.

Purr-fectly happy pet care can administer medications to your fur babies, if required. As a registered veterinary nurse, we have the required knowledge and understanding how best to handle your rabbits.

We provide a grooming and nail clip service which allows us to perform a basic brush, undercoat groom, coat assessment, knot management and nail clip. This service can be provided alongside pet sitting or as a separate house visit.
