
Dog sitting

The perfect stay-at-home day care service!

Purr-fectly happy pet care will tailor our services to you and your fur babies. We understand that our furry companions can get stressed when there are any changes occurring in their daily routine. If they cannot go outside, if they are moved to a different location or when their owner is away.

Each visit will be for a minimum of 20 minutes but we can provide longer durations such as 1 hour or more. Half day sits are available if you do not want your dog home alone. We will also perform a mini health check, to ensure your dog is happy and healthy. As a registered veterinary nurse Heather has the knowledge and experience in performing routine health checks on different species of animals. Let your mind be at ease with the knowledge that your pet will be well looked after.

Purr-fectly happy pet care can only provide day visits for canine companion(s), between the hours of 7am - 7pm. Your dog will **NOT** be lead exercised outside the property. A canine visit will include a toilet break, feeding and fresh water, basic health check and coat maintenance. Interaction through play and a cwtch!

We will keep the home environment clean and suitable to enjoy whilst you are away. We can open/close curtains, switch lights on/off, collect mail and put the bins out as required.

Purr-fectly happy pet care can administer medications to your dog, if required. As a registered veterinary nurse, we have the required knowledge and understanding how best to handle your cats.

We also provide a grooming and nail clip service which allows us to perform a basic brush, coat assessment, knot management and nail clip. This service can be provided alongside pet sitting or as a separate house visit.
