

## 4M WIDE MULTI-SPAN MARQUEES - 2015

The Commercial PE 4x6m

**Marquees have long been the ideal solution for temporary outdoor cover. Nowadays new materials make them more affordable, easily transportable and quick and easy to erect**

### FUNCTIONALITY

This marquee is manufactured in 17 different sizes! And when you need a smaller or larger marquee at a later date, the multi-span option offers flexibility. For example, if you have purchased a 4m x 8m structure but now find that a 4m x 10m would be more suitable, you can purchase a 6m x 10m canopy (roof) and side panels to make your marquee bigger. It comes with a manufacturer's quality guarantee.

Sidewalls are made up of linked 2m bays with each bay having its own zipped side panel, which can be detached to create an opening anywhere around the marquee. Each wall incorporates large Georgian style windows in its side panels. The side walls have 15cm/6" side skirts to promote better water run-off and drainage.

The frame simply slots together and each leg comes complete with a base plated that can be pegged, bolted or weighted, or fitted to base bars.

### DURABILITY

**The range of marquees is built to last. Note the key features and specification**

- ✓ Powder coated framework
- ✓ 240g polyethylene UV-stabilised tarpaulin cover (canopy only)
- ✓ Industrial duty zips on the front and British fire-rated (BS5438 to BS7837)
- ✓ Heavy duty brass eyelets
- ✓ side entry panels
- ✓ Full instructions and care manual
- ✓ Strong 38mm tubular steel frame and 44mm corner joints. Tube wall thickness 1.2mm
- ✓ Georgian style window panels
- ✓ Locating/retaining screw at each joint for stability and strength
- ✓ Heavy-duty velcro and bungee cord
- ✓ 3 Zips on each end panel for 3 different size door entries

**Height Dimensions:** Eve Height: 205cm ; Centre Apex Height: 310cm

**People Capacity:** Standing Auditorium Style: 4x10m = 80 ; Seated at tables: 60 (4x10m)

**Door Dimensions:** Width 3.3m x Height 2m ; Structure Size: 4m x 6m (13ft x 20ft)

**Safety Note:** We recommend that you anchor your marquee during even the calmest weather conditions using a combination of tie down kits, ground bars and sandbags, and heavy duty pegs. Spare parts are available to keep it going for years ahead.
