

Protect Your Beautiful Listed Home From Fire

A fire in a period house can be ruthless and totally devastating, with the potential to not only threaten life, but to completely destroy the building and interior, fully consuming its historic fabric. History lost forever - irretrievable, irreplaceable!

Many forward-looking owners of historic homes have chosen to have a professional assessment made of their fire hazards to help prevent and control fires, bringing them peace of mind for their safety, and the protection and preservation of their beautiful and unique home. Fire & Rescue Services now restrict their new "Safe & Well" home safety visits to only the most socially vulnerable people and homes, so there has never been a better time to arrange your own Historic Home Fire Safety Appraisal.

Fire happens because of a failure to prevent it.
Fire destroys because of a failure to control it.
