File access **anywhere** on **any** device

SolDrive keeps business files and folders available in the cloud.

SolDrive provides an easy way for your business to share and sync important data across multiple platforms, while keeping security a top priority.

SolDrive Features

- File access and syncing across all devices

- Cloud-enable existing file servers

- Team shares

- Third-party file sharing and uploads

- Comprehensive usage reports

- 256-bit AES encryption, in transit and at rest on the server

- 2-factor authentication

- Remote wipes of desktops and devices

SolDrive Features

- ✓ Custom retention period for deleted files and file revisions
- ✓ Granular user access and security controls
- ✓ Revised file backup
- ✓ Managed file sharing for internal and external parties
- ✓ Multiple folder backup (Documents, Desktop, Pictures, etc.)
- ✓ Continuous, real-time backup
- ✓ Bandwidth throttling

Access files from anywhere

Keep all of your files with you wherever you go. SolDrive updates and protects your work. Users can access their files from their laptops, tablets, and phones.

Collaborate with ease

SolDrive empowers users to collaborate on files using Team Shares. Anytime a file changes on a Team Share, everyone will have access to the most up-to-date version.

Minimize risks with SolDrive

If employees are using consumer-grade sync services, such as Dropbox, Google Drive, or Microsoft OneDrive, your business is at risk of data theft, data loss, corrupted data, lawsuits, compliance violations, loss of accountability, and loss of file access.

As your trusted IT service provider, **we promise to work with you to minimize these risks and support your file access needs:**

SolDrive provides an easy way for your business to share and sync important data across multiple platforms, while keeping security a top priority.

Discover how file access can be easy, safe, and secure.
