# Managed Firewall as a Service (FWaaS)

BLUE Profile Firewall as a Service (FWaaS) is a fully managed secure solution offering customers an affordable, protected and tailored service, powered by SonicWall, delivered by our experts

## WHAT IS THE FIREWALL AS A SERVICE (FWaaS)?

- ✔ Built around the SonicWALL security platform – a Gartner Magic Quadrant Leader for Unified Threat Management (UTM).
- ✔ FWaaS includes the firewall appliance, security and management software, plus all the related support and subscription services, neatly bundled together, for a monthly subscription price.
- ✔ This powerful, single service solution consists of the following three solutions;

**Comprehensive Gateway Security** is all-in-one network protection that combines gateway anti-virus, anti-spyware, intrusion prevention, application intelligence and control, content filtering, firmware updates and high performance deep packet inspection with 24x7 support

**Real-time security intelligence** from SonicWall GRID network. Providing one of the highest security effectiveness ratings in the industry, with score out of 100 perfect in stability and reliability, firewall, application control and identity awareness tests.

**The Global Management Systems (GMS)** provides real-time monitoring and comprehensive policy and compliance reporting

## FWAAS BENEFITS

The FWaaS managed service enables you to

- ✔ Assign predictable costs to this area of information security - Fixed, simple, recurring costs to assist you with IT Security budgeting and cash flow
- ✔ Receive up-to-date protection from known and unknown (zero - day) malware threats
- ✔ Fully monitored, fully managed
- ✔ Take advantage of our security expertise and meet compliance objectives

## NEXT-GENERATION SECURITY

- ✔ Superior intrusion prevention and malware protection
- ✔ High performance Deep Packet Inspection, also available for SSL encrypted traffic
- ✔ Content filtering, anti-spyware, anti-virus
- ✔ Trust – the service is built around the SonicWALL security platform - a Gartner Market leader for Unified Threat Management (UTM)

## WHAT'S INCLUDED?

- ✔ Device provisioning and deployment
- ✔ Security event and appliance health monitoring
- ✔ Appliance replacement if required
- ✔ Managed appliance backups and restores
- ✔ Change management and configuration updates
- ✔ Easy to understand management reports
