

NIRBC

ENVIRONMENT, LANDSCAPE
WATER & CIVILS

NIRBC is a relatively young company, started in 2007 specialising in waste water treatment. Over the years we have grown and diversified into different sectors with the help of 30 years of industry experience from A&T Contracts our sister company.

We now also offer a complete groundwork's service from large commercial developments to private housing projects and one off dwellings.

Water attention services through various different methods dependant on needs.

Civil engineering projects involving private clients, Transport NI and other local authorities.

Landscaping works carried out on both large and small scale projects.

An onsite crushing service available for hire.

We pride ourselves on being able to offer value for money on all projects with our expert team on hand to design, plan and construct to meet your requirements, being able to advise on alternative solutions that can save both time and money without compromising on quality.
