

Independent Research Programme

**One Student,
One Tutor,
Endless Potential.**

With so many qualified applicants each year, top universities look for evidence of intellectual curiosity **beyond** the classroom. Our Independent Research Project Programme gives motivated students the opportunity to deepen their knowledge, interest, and skills in their chosen field.

Over the course of the 10-hour programme, you'll work with a world-class academic to explore a topic of your choice. The tutor will tailor the programme to your goals, guiding you to produce research that adds real value to your application.

What You'll Gain

Real Academic Skills

- Academic writing and proper referencing
- Critical evaluation of sources and literature
- Independent research and analytical thinking

University-Level Experience

- 1-to-1 personalised support from a subject expert
- Structured guidance with intellectual freedom
- Preparation for the rigour and expectations of higher education

Subject & Career Exploration

- Deeper understanding of your subject
- Clarity on potential career paths
- Evidence of genuine academic curiosity and initiative

A Competitive Application

- Compelling material for your personal statement or interview
- A stronger academic profile for selective courses
- Potential to submit your project for awards or publication

Project Outcomes

Choose one of two pathways:

Written Research Project

Produce a polished, formal academic paper eligible for competitions or publications.

Exploratory Research Project

Investigate a topic of interest in depth with structured support and academic rigour.

99%* of our surveyed university applicants received an offer from their first or second-choice university.
