Overview

Business Warehouse, earlier known as Business Information Warehouse is a comprehensive and packaged Business Intelligence product optimized for SAP R/3 environment around a data warehouse. BW delivers Reporting, Analysis and Interpretation of business data to optimize and enable the organizations to meet the necessity and to take crucial business decisions. SAP BW enables OLAP (Online Analytical Processing) for analyzing the information from huge amount of historical and operative data.

What will you learn?

- Learn about InfoObject and InfoCube in SAP
- Data store objects functionality
- Learn LO-Cockpit description and Data Sources
- Business Explorer web application and query
- Using BEx Analyzer for Restrictions and Exceptions
