

KUBOTA DIESEL RIDE-ON MOWER

GR1600-II

With top of the range features, yet simple to use, the GR1600-II makes mowing easy and rewarding.

Kubota

Make your lawn look as beautiful as your home. Get a professional looking cut every time with the GR1600-II.

A beautiful, well-manicured lawn can be yours with the Kubota GR1600-II ride-on mower. It boasts a sleek appearance and aerodynamic body, making the GR1600-II pleasing to the eye.

But, more importantly, this mower is a snap to operate and maintain, offering a host of high-performance features including a newly redesigned, larger capacity grass collector.

The GR 1600-II gives you the power to achieve the kind of results that can upgrade the value of any home.

KUBOTA DIESEL RIDE-ON MOWER
GR1600-II

A pleasure to behold and easier than ever to operate.

The stylish design of the GR1600-II begins at its aerodynamic bonnet and sleek headlamps and continues all the way back to its newly fashioned and easy to use rear grass collector. But the beauty of its design doesn't end there. The GR1600-II is also surprisingly comfortable. Its ergonomic design features include a full-flat deck for more legroom and an Easy Checker® dash for clear and precise viewing of all the tractor's controls.

With the GR1600-II, impressive commercial-grade results are within anyone's grasp.

Ensuring high performance is the GR1600-II's mower deck, which utilises a similar design, cutting, and collecting system as our professional-grade mower decks. However, with its user-friendly operation, you needn't be a pro to enjoy its outstanding performance. The deck's cutting width is an ample 42 inches, and has the power to take on even tall, dense grass. The 370-litre grass collector requires only a light touch for dumping, easily removable, and an optional rear deflector is also available.

Easy reach cutting height adjustment dial

Deck cleaning pipe for connecting water hose

Gas-assisted mower lift lever

Ultra-durable, long-life hexagonal belt

New maintenance features.

The new grass collector on the GR1600-II is lighter and much easier to use. The lid of the collector now opens wide, making easy work of maintenance. Also, its dumping lever, with gas-spring assist mechanism, makes easy work of emptying the collector's contents.

Large capacity grass collector

Incredibly sturdy yet lightweight, the large capacity, 370-litre grass collector lets you mow longer with less stopping for emptying.

Rear Deflector

An optional rear deflector is available for times when you choose not to use the grass collector. This deflector discharges grass and dust directly onto the ground and easily attaches to the end of the duct, which leads from the mower deck.

Mower duct improvements

A host of improvements have been made to the duct leading from the mower deck. It was enlarged to prevent clogging. A new electronic sensor was added to signal when the collector needs to be emptied. A new lever on the side of the tractor, allows the operator to expel excess grass from the duct without leaving the tractor seat.

HST transmission

Kubota's reputable and versatile HST transmission is easily controlled by a single foot pedal and produces a maximum travel speed of 10 km/h.

Shaft drive

Unlike the belt-drive system used in petrol mowers, our shaft-drive transmission, shaft-drive PTO, and wet-type mechanical PTO clutch are incredibly durable and trouble free.

Power, reliability and savings. The hallmarks of a Kubota engine.

Amazingly, the GR1600-II's fuel efficient 13.5 HP diesel engine can compete head-to-head with a 20 HP petrol engine. To further extend your uninterrupted mowing time there is a large 18-litre gas tank fitted. Another plus is that our diesel engine requires no special maintenance during the off-season. And finally, when you consider cost and performance the GR1600-II delivers outstanding value for your money.

SPECIFICATIONS

Model	GR1600-II	
Engine		
Type	2 cylinder, diesel, water-cooled	
Gross horsepower	HP (kW)	13.5 (10)
Fuel tank capacity	ℓ	18
