WHO WE ARE

Fat Finger Technologies is a dynamic team of knowledgeable individuals. A decade of experience later, we continue to take pride in old-fashioned qualities like prompt and efficient solutions, because good service never goes out of fashion! A well-maintained networked computer environment is proven to help good folks like you, become more efficient in your service delivery. We tackle each task with cost-effectiveness in mind to make sure we don't break the piggy-bank.

We have adapted to most IT environments and if we don't know, we learn, thereby adding to our experience. We offer simple office networks to full cloud-hosted solutions to public facing networks with internet fail-over. Clearly, no job is too big or small - so we've got your covered 24/7.

VISION & MISSION

Our goal is to have happy and efficiently operating clients wherever we provide our services who are proud to be serviced by Fat Finger Technologies. With greater efficiency

EXPERIENCE GREAT IT FIRST-HAND WITH FAT FINGER TECHNOLOGIES.

FAT FINGER TECHNOLOGIES

SERVICES

DESKTOP & SERVER SUPPORT

For any business to thrive they need a stable computer system. We pride ourselves in servicing and maintaining our clients' systems to be as efficient as possible.

HOSTED DOMAIN & EMAIL

The number one point of communication for any business is their email. Having a secure & reliable email hosting system is essential for keeping in contact with your clientele.

WIRED & WIRELESS NETWORKS

Designing a solid core network Infrastructure, be it wired or wireless, where all devices are able to communicate with each other and the network devices such as printers, etc ensures for productive work processes. Securing the wireless network with guest network isolated ensures company communication and data is secure

BACKUP & DISASTER RECOVERY

Apart from protecting your business' Work in Progress, one must be ready for worst case scenario. Most small businesses make the mistake of not taking BACKUPS seriously until they have become victim of data loss.

By simply ensuring that a strict backup schedule is in-place one can avoid the costly event of losing their priceless company data. We offer on-site, cloud & hybrid backup solutions so as to ensure disaster recovery.

HARDWARE & SOFTWARE
SALES & SUPPORT

Whether you are looking being at the cutting edge of technology or just keeping systems running smoothly. We can source all your required hardware and software at competitive rates as well as provide prompt & efficient after sales support.

INTERNET SECURITY & FIREWALLS

An often-over-looked aspect of a business' systems efficiency and stability is having a reliable Internet Security application protecting their PC's from attacks and infections.

This tied together with a firewall appliance to restrict access to
unproductive web content ensures end-users are solely focused on their work.

OUR PARTNERS

Acronis Cloud Backup & Disaster Recovery

In today's day and age business data is crucial to a business' success. Many SOHO's lose their data because they simply don't back up. They see backups as too time-consuming and expensive and requires specific expertise they don't have. Historically, such complaints are justified – until now. We provide full management of the backups to the secure AES256 cloud storage platform. This cost-effective and complete data protection service. Running in the Acronis Cloud, Acronis Backup is a backup as a service solution that delivers advanced cyber protection that's packaged and priced for small infrastructures.
