- Specialist Top Soil Provision

Hedge, Shrub and Tree Planting

Our extensive experience in reclamation means we are able to advise on topsoil suitability and improvements to ensure successful planting schemes.

Semi-Mature Tree Planting

The supply and planting of large semi-mature trees is a specialism that we can carry out with our in-house planting teams. Working closely with our customers and landscape architects we are able to provide assistance in the final design and suitability of large semi-mature trees.

Annual visits to the larger European tree nurseries are undertaken where our operatives are trained in the most up to date, safe and efficient method of tree handling.

Tree pit construction in roads and hard surfacing is another skill and a feature that goes hand-in-hand with semi-mature tree planting, preventing future damage to surfaces, whilst ensuring the trees thrive for the next 150 years.

Forestry Tree and Shrub Planting

The backbone of the company since its inception, NT Killingley have supplied and successfully installed millions of native broadleaved and coniferous trees and shrubs over the years on a wide range of projects.

Our site operatives are extremely experienced in handling and planting forestry whips, we are able to install vast areas of woodlands at a high rate of production as well as fitting an array of tree and shrub protection.

Amenity Shrub and Tree Planting

A well thought out planting design that adheres to a detailed and stringent specification maximises on the visual impact of any scheme.

With a dedicated and time-served horticulturist team, we are able to undertake high-quality installations and can provide valuable professional advice throughout the project when value engineering is required.

Amenity Forestry

Forestry planting has changed and continues to change, from pure forestry and reclamation to leisure and wildlife parks, we have kept pace with these developments and have a full understanding of the current needs and requirements.

Our specialties include:

- Public all ability access paths and roads
- Mountain bike trails including all categories of run, whether they are stone or timber constructions Bridges, pontoons and decks
- Water features including lakes and ponds
- Wild flower meadows

Seeding & Turfing

A modern and dedicated fleet of specialist seeding equipment including compact and high powered tractors plus a multitude of attachments enabling us to undertake an array of seeding from Sport Pitches to vast Reclamation projects.

We have unrivalled experience in soil amelioration and soil manufacture and have some of the most specialist equipment in Europe for this work.

Topsoils can be created from a range of sources, including subsoils or colliery shales found on site.

As holders of a lifetime Environment Agency Mobile Spreading Permit, we are also able to use waste streams to create soils, which can be a very cheap alternative to standard topsoil provision.

We can help in specifying the relevant seed mix for any project

Site Clearance and Specialist Tree Felling

A fully comprehensive arboricultural service which includes the ability to undertake tree surveys and provide associated reports and support.

Our arboricultural operatives are highly trained, fully qualified and vastly experienced. Each operative holds the relevant CSCS accreditation required to undertake a variety of tasks.

With a fully experienced and multi-discipline team our capabilities include:

- Tree Felling
- Scrub Removal
- Forestry Mulching
- Stump Removal & Grinding

Our specialist services include:

- Large Scale Schemes
- Waterways - Using Pontoons & Boats
- Flood Alleviation Schemes
- Environment Agency Emergency
- Response
- Traffic Management

Detailed Method and Risk Assessments are completed well in advance of any works and a dedicated Project Manager is tasked to ensure that they are adhered to at all times.

Fencing

We can offer a full and comprehensive supply and installation of any type of fencing, in a clean and efficient way, causing minimum disturbance.

Where wildlife considerations are in place we can provide solutions that allow for the protection, migration and control of many species.

We are able to provide our customers support and advice in specifying the most relevant and economical products for your schemes.

Where possible, NT Killingley use a fully mechanised approach to fence installation which enables us to erect incredibly efficiently with minimal disruption to surrounding areas.

Sports Pitch Construction and Maintenance

Complex projects are a particular speciality as the Company has a large skilled in-house workforce and have experience in natural pitches, artificial sports pitches, play areas, MUGAs, natural pitches, bowling greens, drainage and maintenance work.

We also carry specialist GPS 3D controlled equipment for surface preparation. This is very useful for sports pitch work as we can produce a full 3D model for cut and fill balance on a pitch to ensure proper drainage and a zero import/export of materials.

Grounds Maintenance Services

With over 40 years' experience in grounds maintenance, our teams use only the latest and most efficient mowing equipment to ensure that the highest standards of work are always met.

Specialising in complete grounds maintenance for both commercial and sports pitch facilities we always pay close attention to the environmental impact of our work. Actively supporting biodiversity and nature management schemes we aim to improve the environment for both wildlife and local communities.

For grounds enhancement, we can offer a tailored plan of flower rotations, plantings, mulching and seasonal clean-up along with tree management, pest and disease management.

We can also offer a winter maintenance service that provides a full-scale snow and ice management with a road and path gritting program designed to meet your critical needs.

As well as holding current CHAS certification all our operatives have enhanced DBS checks.

Our Grounds Maintenance Services include:

- Sports field mowing
- Sports pitch installation and marking
- Ornamental and formal lawn mowing
- Strimming
- Weeding
- Winter and summer bedding plants
- Bulb planting
- Mulching
- Winter gritting and snow clearance
- Pruning
- Jet washing
- Tree felling and dismantling
- Full tree surveys
- Grass maintenance and weed control
- Fertilising
- Facilities maintenance
- Total weed control (inc Japanese knotweed)
- All types of herbicide application
- Forestry establishment and maintenance
- Natural play installation
- Dedication Grounds Maintenance Manager
