

# POST OPERATIVE ADVICE

Your son should have his first bath tomorrow

Please let him have a soak for 10-15 minutes in warm water and then from the day after please bath twice a day for the same length of time, morning and evening until the ring completely drops off!

Allow up to 10 – 12 days for the ring to drop off and in the meantime, expect the penis to be swollen, red and sometimes doubled in size!

If the ring has not fallen off by end of day 12 please call me.

There is a Dressing under the ring that prevents any bleeding, so please do not worry and mistake that for skin.

If you notice a small grey area that will turn yellow at the tip of the penis, it is the cautery we use to stop the bleeding at the time. All will heal up nicely after about 2 weeks.

A yellow discharge around the edge of the bell is normal.

Call me if there are any concerns on 0787 013 1507

Please do not worry!

Dr Basith Amjad and Team.
