

Surefast Bolting Services Limited specialist manufacturers of all types of safety-critical fasteners, precision machined components and high integrity bolting for Oil & Gas, Petrochemical, Offshore, Power Generation, Defence, and Heavy Engineering applications.

Based in the heart of the United Kingdom and serving a global marketplace, Surefast can supply any type and size of Specialist Fasteners and Bolting – fully tested and certified to customer-specific requirements.

From commercial carbon steels and stainless, through to exotic high performance alloys – Surefast are experts in the machining of all types of material including nickel alloys, bronzes, super-duplex stainless, aerospace materials and petrochemical specification materials.

Extensive manufacturing capabilities, comprehensive quality control and CMM inspection facilities – Surefast can supply components to any level of high integrity laboratory testing and certification.

With a strong focus on safety and employee welfare, the Surefast manufacturing facility has a highly experienced workforce – aiming for zero defects and on-time component manufacture through efficiency, quality control and continuous improvement.

A large number of CNC lathes, VMC machining centres and semi-automatic EMI-MEC lathes are combined with a wide range of conventional machining equipment – enabling us to manufacture virtually any size and type of precision component.
