# 1. INTRODUCTION

SREE CONSTRUCTIONS provides one stop Concrete solution for your trade and industry. Depending on the demand of your project, we produce different grades of concrete and give services to meet your requirements. We provide the optimum and customized solutions made for your project.

SREE CONSTRUCTIONS began its business operation as a concrete raw material providing company in September 2017 and further started two RMC Plants in Hyderabad, TELANGANA. The company holds the following Plants which are in operation.

## 1. STONE CRUSHER PLANT-I

**Make:** Puzzolana

**Rated Capacity:** 200TPH

**Stage:** Three

**Location:** Ramdasspally, Ibrahimpatnam, Telangana.

## 2. STONE CRUSHER PLANT-II

**Make:** Puzzolana

**Rated Capacity:** 200TPH

**Stage:** Three

**Location:** Gowlidoddi, Gopanpally, RR Dist.,

A **Crushing plant** is one-stop crushing installation, which can be used for rock crushing, garbage crushing, building materials crushing and other similar operations. Crushing plants may be either fixed or mobile. A crushing plant has different stations (primary, secondary, tertiary ...) where different crushing, selection and transport cycles are done in order to obtain different stone sizes or the required granulometry.

## Components

Crushing plants make use of a large range of equipment, such as a pre-screener, loading conveyor, intake hopper, magnetic separator, crushing unit, such as jaw crushers and cone crusher etc.

- **Vibration Feeder:** These machines feed the jaw and impact crusher with the rocks and stones to be crushed.
- **Crushers:** These are the machines where the rocks and stones are crushed. There are different types of crushers for different types of rocks and stones and different sizes of the input and output material. Each plant would incorporate one or several crushing machines depending on the required final material (small stones or sand).
- **Vibrating Screen:** These machines are used to separate the different sizes of the material obtained by the crushers.

Head office contact nos: 9581422115, 9100622115, 9885422115				

- **Belt Conveyor:** These elements are the belts used for transportation of the material from one machine to another during different phases of process.
- **Central electric Control system:** Control and monitor the operation of the entire system.

### Process of crushing plant

1. Raw materials are evenly and gradually conveyed into jaw stone crushing equipment for primary crushing via the hopper of vibrating feeder.
2. The crushed stone materials are conveyed to crushing plant by belt conveyor for secondary crushing before they are sent to vibrating screen to be separated.
3. After separating, qualified materials will be taken away as pre-finished products for the third and final stage in to the VSI, while unqualified materials will be carried back to the stone crushing equipment for re-crushing. And customers can classify final products according to different size ranges. All the final products are up to the related standards. Of course, according to different requirements, customers can adjust the size of their final products from this stone crushing plant.
4. Clients will get the satisfactory products after objects being crushed in three stages.
5. Finally the stones are crushed in different stages to take the required shape of 40mm, 20mm, 10mm down size aggregates and fine aggregate (Manufactured sand).

### 3. READY MIX PLANT- I

**Make:** Aquarius

**Rated Capacity:** 60 cu.m per hour

**Type:** Twin shaft

**Location:** Vattinagulapally, Rajendranagar, Telangana.

### 4. READY MIX PLANT- II

**Make:** Aquarius

**Rated Capacity:** 60 cu.m per hour

**Type:** Twin shaft

**Location:** IDA, Bollaram, Telangana

Also have the following Vehicles and equipment for operations.

- |  |   |       |
|--|---|-------|
| 1. RAW MATERIAL TIPPERS                  | - | 15 no |
| 2. TRUCK MIXERS (6cu.m cap., each )      | - | 35 no |
| 3. CONCRETE PUMPS ( 60cu.m per hr)       | - | 08 no |
| 4. EICHERS (Attached to Concrete Pumps ) | - | 08no  |

SREE CONSTRUCTIONS				
<b>HEAD OFFICE:</b> 4-33, BK Enclave Miyapur	<b>RMC PLANT- I:</b> Vattinagulapally Rajendranagar	<b>RMC PLANT- II:</b> IDA, Bollaram SangaReddy	<b>STONE CRUSHER- I</b> Ramdasspally Ibrahimpatnam	<b>STONE CRUSHER- II</b> Gowlidoddi RR Dist
Head office contact nos: 9581422115, 9100622115, 9885422115				

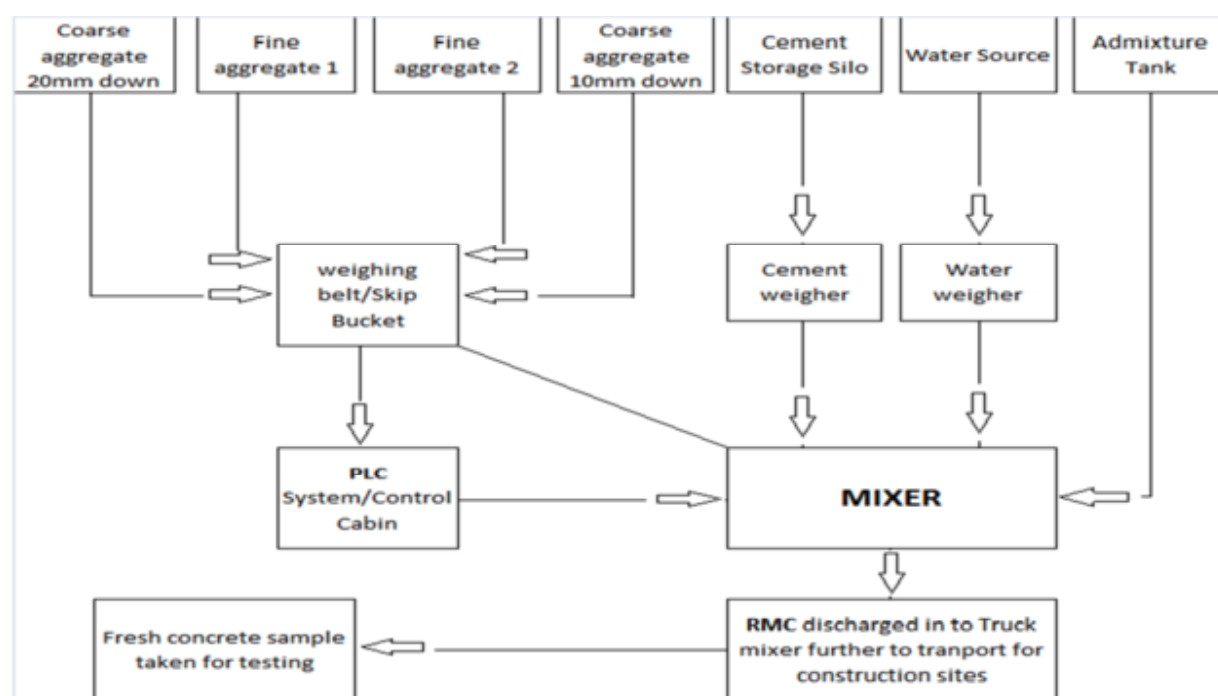

Ready-mix concrete (RMC) is a ready-to-use material, with predetermined mixture of cement, sand, aggregates and water. RMC is a type of concrete manufactured in a factory according to a set recipe or as per specifications of the customer, at a centrally located batching plant.

It is delivered to a worksite, often in truck mixers capable of mixing the ingredients of the concrete en route or just before delivery of the batch.

This results in a precise mixture, allowing specialty concrete mixtures to be developed and implemented on construction sites.

The second option available to mix the concrete at the batching plant and deliver the mixed concrete to the site in an agitator truck, which keeps the mixed concrete in correct form, In the case of the centrally mixed type, the drum carrying the concrete revolves slowly so as to prevent the mixed concrete from "segregation" and prevent its stiffening due to initial set.

#### Flow Chart of Manufacturing Process:-

SREE CONSTRUCTIONS is focusing exclusively in high quality and cost-effective concrete development and implementation of premium services. We are advancing on a tremendous pace and with involvement of skilled and experienced people working in the organization. SREE CONSTRUCTIONS is currently doing business in projects for Panchayat Raj, MNCs and the Large Corporate Sector.

## 2. SREE CONSTRUCTIONS: YOUR CUSTOMIZED PARTNER

The company has been formed by the Managing Partners **Sri O. Surender Reddy** and **Sri O. Prasuna Reddy**, having vivid experience and wide exposure in Construction Industry. People involved here are qualified and experienced who came from the renowned employers.

The resource personnel working in the company have been consistently providing reliable support services to a wide range of corporate projects either in the capacity of executive or as consultant. Bottom line of the company philosophy is building a long-term business partnership with its clients where interpersonal relationship, reliability, assured quality and target oriented modern technology are the major building blocks.

It is a company where professionals from both technical and functional field group together with an objective of providing appropriate business solutions. It realizes the importance of functional knowledge and its impact in developing business solutions. We constantly strive to be a leading technology firm with profound business and functional knowledge. The key to the company's success is the maintenance of a close working relationship with the clients through ensuring the best possible solutions to their needs; to establish and maintain a thorough knowledge and understanding of client's objective and help them maximize the benefits.

We want to establish ourselves as the best choice in providing best quality concrete supply and Development by offering the full spectrum of services.

### 3. OUR MISSION & VISION

**Our Mission** is to achieve the reputation of a quality, high standard & reliable solution & service Provider Company in the Construction Industry.

**Our Vision** is to achieve 100% customer satisfaction by delivering quality product and services at an affordable cost. Our forward vision is to strive to become an entity in technology based corporate solutions, capable of demanding unconditional response from the targeted niche. We also believe that for our scope of improvisation – sky is the limit and we are always ready to take our achievements to the next level. We are growing and would always like to remain on the growing streak.

**Our keys for development:**

- Desire for Excellence
- Trust and confidence build-up
- Innovation
- Transparency
- Teamwork

**We believe in**

- Motivation
- Collective responsibility and leadership
- Professionalism and ethics
- Adding values to our client needs

## 4. STRENGTH & CAPABILITIES

The team of SREE CONSTRUCTIONS is equipped with proper human resources specialized in different system development tasks. The key areas are;

### ■ PRODUCTION CONTROL

Production team combines both functional and technical personnel. We believe to develop a proper system of which functional personnel is equally important as technical personnel. Our team involves in every process of production in achieving the targeted output.

### ■ QUALITY CONTROL

Our team of Quality personnel guided by a QA/QC Head involves in the process control right from the raw material inflow to the final product dispatch. Also keeps good control over sites/projects monitoring the activities until the final placing of the product with utmost customer satisfaction.

### ■ SERVICE

We have employees such as TM operators, concrete pump operators, pipe line gangs for pump with good expertise in their fields and always have the strive to achieve the utmost customer satisfaction in providing better service at all the times.

## 5. PRODUCT OFFERINGS

### 1. Raw material such as:

40mm down size aggregate, 20mm down size aggregate, 10mm down size aggregate and Manufactured sand/Crushed rock fines(CRF)

### 2. All Concrete grades such as :

M7.5, M10, M15, M20, M25, M30, M35, M40, M45, M50, M55, M60 etc.,

## 6. LIST OF SOME MAJOR CLIENT

### RMC CLIENTS:

1. ALL EIPL PROJECTS
2. ARYAMITRA PROPERTIES AND DEVELOPERS
3. SRUSTI INFRA
4. ADITYA HOMES
5. VEDIC CONSTRUCTIONS
6. HALL MARK BUILDERS
7. NIVEE PROPERTIES
8. SUKSHETRA CONSTRUCTIONS
9. VEEYAR ENGINEERS

### RAW MATERIAL CLIENTS:

1. ACC LTD
2. NUVOCO
3. RDC
4. HMDA ANCON
5. PLATINUM SAI CON(I) PROJECTS LTD
