PURITE VEOLIA

Water Purification Systems

Purite specialises in the design, development & manufacture of advanced, high performance laboratory water purification systems. Every Purite system is designed to meet the needs of specific applications, providing high levels of water quality, consistency and reliability using a wide range of advanced technologies

Purite systems are compact, robust, simple to use and easy to maintain. Available in various standard models: Analyst, HP, Purewater 300, Fusion, HPA 30 and Neptune Ultimate

All models feature:-

- Space saving design
- RO removing >98% minerals and >99% bacteria
- Choice of production rate
- Optional external storage tanks
- RO boost pump as standard
- LCD colour touchscreen
- And much more

Purite Fusion

The Purite Fusion is a self contained unit that reliably delivers a steady supply of 18.2MΩ.cm purified water from a mains supply to life science labs or anyone needing water of this purity.

- Dispense rate of up to 2 litres/min
- Water quality parameters displayed, TOC, MΩ.cm, °C & flowrate
- UV LED disinfection built into dispense head
- WiFi enabled for remote monitoring & operation

The Labwater 1&2 are simple, cost effective methods of producing 10-1µS.cm purified water at low volumes. They have easily replaceable cartridges containing a colour changing resin to show when it needs replacing. Typically wall mounted & connected via a dedicated hose to a tap or stopcock and operate direct from water pressure requiring no external electrical supply.

Labwater 1 & 2

Purite offers a range of long life cartridge packs and consumables that are easy to change. If you're looking for a new water purification system then get in touch today.
