Utility SMART
Half Hourly and Smart Meter Dashboard

Utility **Smart** is an easy to use online dashboard platform that brings your Smart or Half Hourly Meter data to life.

Utility Smart provides entry level, in-depth views of your buildings existing smart meter consumption to provide you with energy consumption, carbon use & electricity cost.

Utility Smart lets you understand how your energy use relates to your Tariff charges, e.g. Time of Use, Capacity, Day/Night. Alerts are also provided to let you know when relevant energy use events or costs occur. Smart meter data is supplied up to previous day.

minute data intervals	dashboard platform	single data source	collects kWh data

Displays energy consumption at day + 1 via dashboard. Providing electricity data in historic views and useful metrics such as kWh/sq/m, kWh/per person & cost per sq/m

Start your journey today on the **Utility Smart** plan and see the energy saving opportunities in your organisation within weeks.

The **Utility** range of plans allows you to upgrade your monitoring and verification activity when your business grows or demands it.
