

Private and Confidential

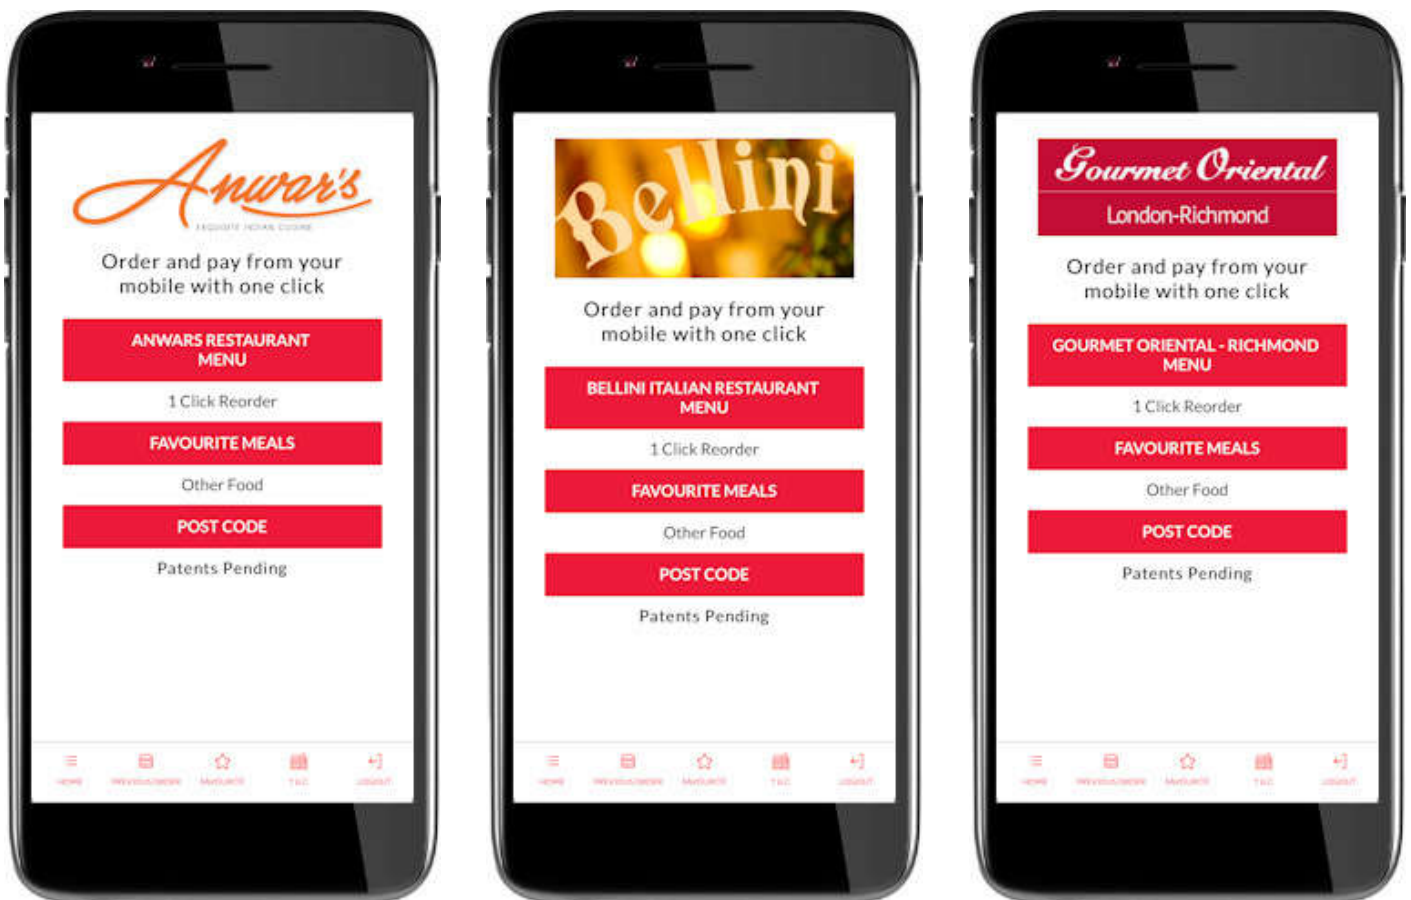

“fudz” pronounced “foods” (<https://www.fudz.co.uk>)

fudz™ is a brand of Secure Card Payment Ltd (SCP)

International Patent Applications

SCP supplies your own free App and Web Site

There are no set-up, start-up, monthly or annual Fees

Why use “fudz”?

The App makes it easier for your customers to order food from you.

Favourite meals can be ordered and paid for with one click

The App works even when there is no Wi-Fi or Internet connection

Your customers buy directly from you; your data is secure.

Transaction cost just 5%*, no weekly, monthly or annual fees.

We supply powerful free EPOS software with website and App updating.

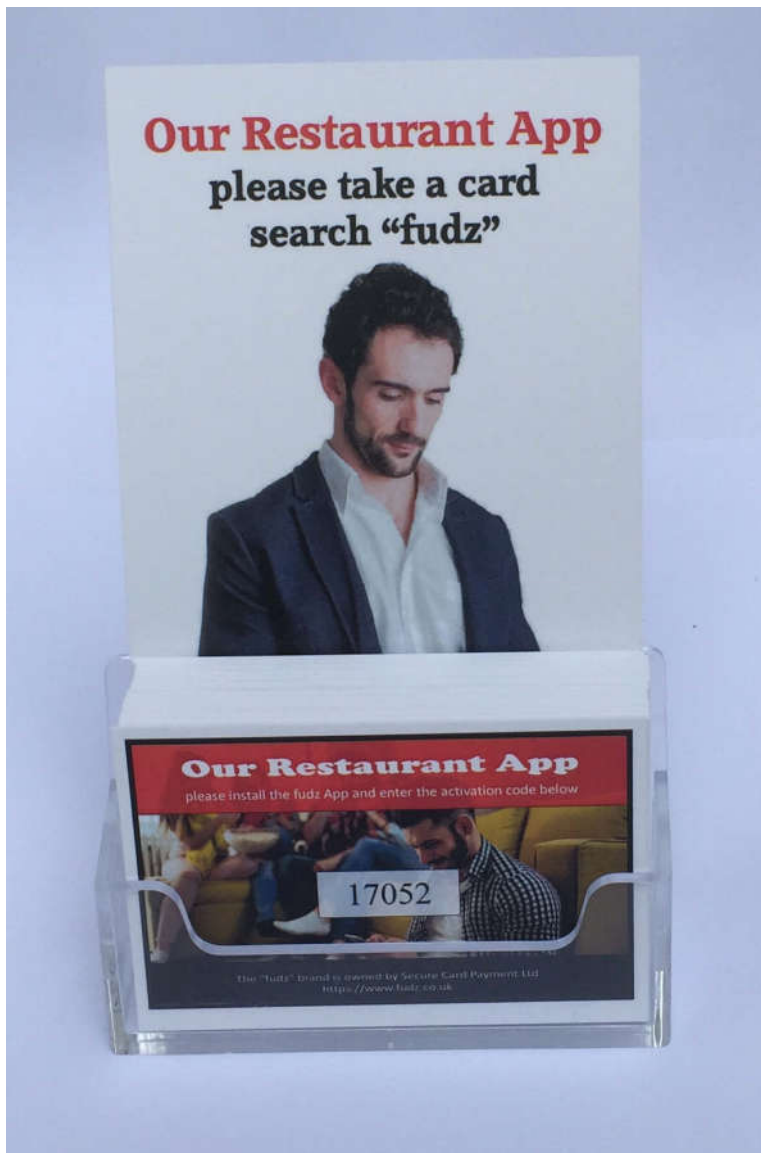

The App becomes your personal App by entering an Activation Code.

*Transaction cost will rise to 7.5% following first 100 live account sign-ups.

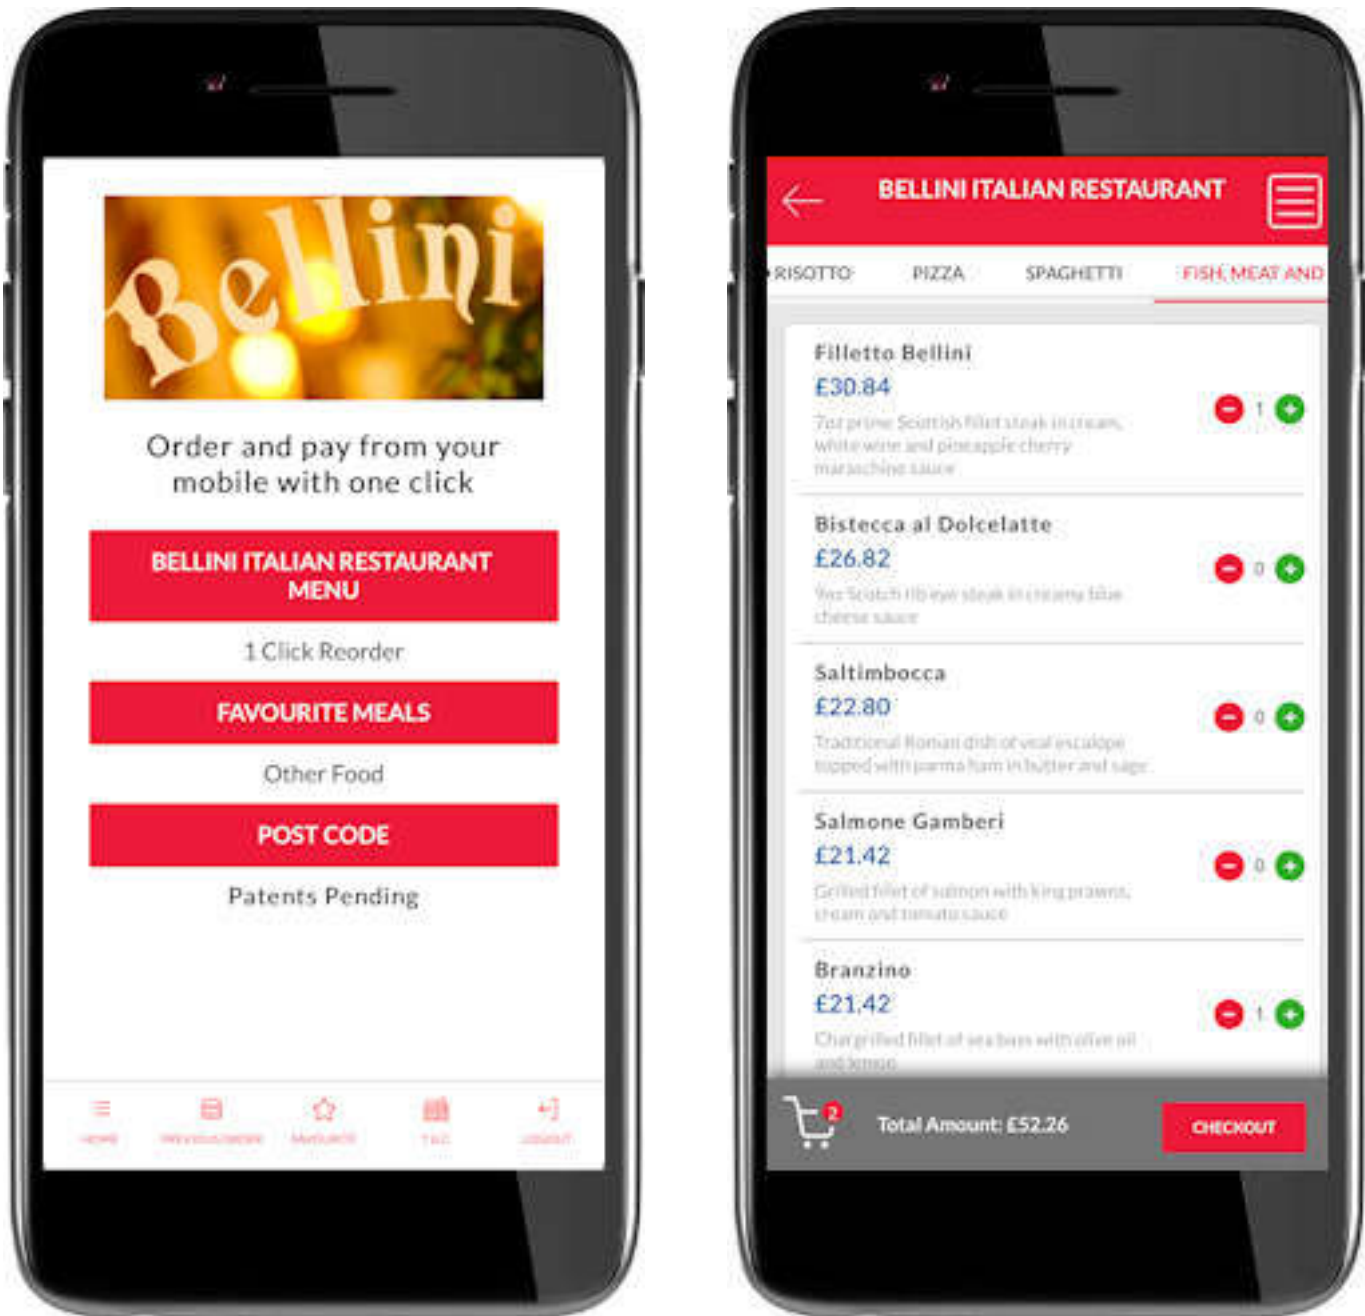

Your Restaurant Activation

SCP supplies your unique Activation Code; your customers install the fudz App for iPhone or Android and enter your unique code. SCP supply 1,000 POS cards and desktop holder.

How the App works

The Activation Code for Bellini Italian Restaurant is 17052

Your Restaurant or Takeaway App

The App only lists your menu items and each App page is headed by your restaurant name. The only link to SCP is the help email address: help@securecardpayment.net. Orders are processed by Stripe and paid by BACS, every day, into your bank account, less our commission. All orders are listed in your online back office and can be checked. You can also log into your Stripe account and process refunds etc.

Developing and Supplying EPOS software since 2006

Software and Website Development since 1999

We have developed more than 100 websites including online shops, restaurant and takeaway food ordering, gambling, directory and competition websites. Our clients include The Oxfordshire Press, Benham Goodhead Print Group, Triple Helix Wargames and Ed Baines' (ITV's "Britain's Best Dish") restaurant in Soho. Gourmet Oriental in London has been a client for more than eight years.

We worked with the USA company Salad Creations, Subway's main competitor in the USA, in 2008 and supplied EPOS software for their pilot takeaway in Dublin. The software includes Sales and Purchase Ledger, Human Resources, Stock Control, Chef's Menus with Meal Ingredients, News Letters or Daily Menus, Special Offers by Email or to Mobile Phone, Ordering from the Till or Telephone with Caller ID Customer Recognition (MySQL database).

We will supply the EPOS software for free provided they use our payment gateway.

NBC News Channel 4HD, 2 October 2006
SMS Mobile Phone Ordering

Following the Wall Street Journal Report, 20 September 2006, NBC produced a news item about ordering food by mobile phone. An example was given of a person ordering their coffee from the train and collecting the coffee when they arrived at the station.

Thereby not having to queue up to order the coffee and pay for it. The order was automatically processed and sent to the "kitchen". You showed your mobile phone order acknowledgement and collected the order.

"Beat the Queue" was televised on 2 October 2006.
NBC News broadcast on YouTube, 2 October 2006.
