CONSTRUCTION WASTE

Rollonoffs or Roros are designed for handling large quantities of bulky waste, and is an economical waste management solution to industrial and commercial establishments.

The vehicles are designed to carry larger containers for removing and transporting large volumes of heavier waste materials such as building material and construction waste. The vehicles use a hook loader to pull the bin onto the truck. The bin has small wheels on one end to enable it to be pulled onto the truck. They are often used to service large industrial, manufacturing and retail locations.

Wilrose provide containers on an ad hoc basis or through a hire contract and collections can either be scheduled or collected on request. Wilrose will always aim to beat your current price.

Ideal for large amounts of general waste.
Lidded/ locking options available.
Guaranteed Collection - whenever you need it.
Scheduled or on demand collections.
Short term or long term available.

Many container sizes: 15yd, 20yd, 35yd to 40yd.
Compactor containers size: 35 cubic yards.
