

Looking to work on the London Underground or the Network Rail but not sure how?

The UK government is investing billions in railway infrastructure with new initiatives like Cross-rail and HS2 coupled with station upgrades on London Underground and Network Rail. There has never been a better time to consider a career in the rail industry.

How to Get a Job on The Railway - Steps to a New Career

The Sentinel Card ICI (Industry Common Induction for Network Rail) or ICI-LU (Industry Common Induction with London Underground Endorsement) is the mandatory health and safety permit which allows you to work on the London Underground or Network Rail. In order to obtain this, it is essential that you are sponsored by a rail recruitment agency or contracting company.

That's where we come in.

Atom Training Centre is an approved and accredited rail training centre and also a rail recruitment company. We cover the whole London area, Essex and Kent respectively. We will sponsor you, arrange and book your course at our centre in Barking, as well as ensure that you are fully prepared and have all the information required to pass your ICI or ICI-LU Course!

We do not just offer training, we provide rail jobs. If you are a tradesman, an engineer, a surveyor, an architect, a cleaning operative or a safety critical personnel, this is for you.

Our Rail Training Courses include but not limited to:

[Sentinel Card Industry Common Induction](#)

[Network rail Medical, Drugs and Alcohol Testing](#)

[Network Rail E Learning - PTS E Learning Course](#)

[PTS Course - PTS Card](#)

[Lookout Course](#)

[COSS Course - Controller of Site Safety Course](#)
