# ONBOARD TRACKER OVERVIEW

**Onboard Tracker** - reduces the number of systems used to track your people and assets whilst transforming visibility and reporting within your company. Its modular structure and import features cut costs, strip out duplication of effort and streamline processes.

## KEY BENEFITS

Onboard Tracker sets the new standard for Operations, Certification and Competence Software.

### Proven Success

Onboard Tracker is in daily use successfully supporting people and asset operations in more than 30 countries across 5 continents.

### Affordable

Onboard Tracker is a monthly subscription SaaS (Software as a Service) model with no upfront capital cost.

### Low Risk

We've invested over 40,000 man hours of development and built the system for you. Sign up, switch on and start!

### Enterprise Class

Onboard Tracker uses secure, globally replicating datacentres for resilient worldwide access.

### Integrated

Our modular system can link to your current company systems and data sources.

## Onboard Tracker - brings all of our years of industry experience into a configurable, cloud based Software as a Service (SaaS) platform.

Founded by Kevin Coll in 2012, Onboard Tracker is an easy to use online tracking, operations and certification hub which enhances the visibility and safety of people, crews and assets in global oil and gas.

Having developed software systems for many clients to track people, helicopters, ships and oilfield equipment documents, Onboard Tracker brings all of our years of industry experience into a configurable, cloud based Software as a Service (SaaS) platform.

Onboard Tracker is now used in more than 30 countries across the world by our clients to support their daily operational activities. Onboard Tracker is a uniquely fit for purpose, flexible and scalable software which is kept continually up to date and copes with the demands of highly regulated industries such as Oil and Gas.
