

SEALCRETE
GROUTING PLANTS

SIMEM SEALCRETE IS A CONTAINERIZED SERIES OF GROUT PLANTS UTILIZING COLLOIDAL MIXING TECHNOLOGY COMBINED WITH AGITATION TANKS, PUMPS AND FULL AUTOMATION.

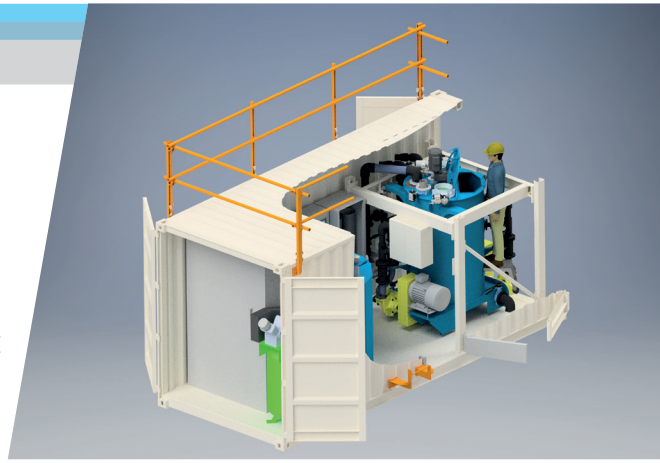

SEALCRETE plants are used in **a wide range of applications** including bi-component grout production for tunnel boring machines (TBM's), lightweight cellular concrete systems, jet grouting, deep soil mixing and more.

SEALCRETE plants **can be combined with a full range of auxiliary** equipment including containerized liquid storage and agitation tanks, containerized silos, foam generators and skid mounted pump systems creating a range of complete solutions with standard capacities of 15 to 50 m^3/hr.
