

Pelloby Cranes

Pelloby Ltd. are one of the UK's leading crane manufacturers, having designed and produced reliable lifting equipment for use worldwide since 1968. Our product range covers everything from simple hoists and small jibs, to large overhead and gantry cranes. We also produce bespoke special cranes and complex automated handling systems.

Dealing with both trade clients and end users directly, Pelloby project manage each order from quotation through to delivery, installation and final commissioning. We also offer preventative maintenance contracts, operator training, inspections and breakdown support.

World leaders in jib & overhead cranes

Every single crane Pelloby produce is made to order at our UK factory, guaranteeing you receive a solution of the highest quality custom built around your lifting requirements.

- >> **UK design and manufacturing** – We can design and supply every element of your crane, from the steelwork to the hoist.
- >> **Optional extras** – Find a customised lifting solution tailored to the application in hand. Choose every detail down to a paint finish that matches your corporate colours, galvanised protection for outdoor applications, walkways, floodlights, and safety features such as parking locks.
- >> **Any size, any capacity** – From standard cranes for infrequent lightweight applications, through to heavy duty systems used daily, we'll provide a solution to suit.

Bespoke cranes & automated handling systems

In addition to our standardised offerings, we can also provide bespoke solutions to complex handling requirements, no matter how unique or challenging the application.

- >> **Special cranes** – We can design unique features such as telescopic/retractable extensions, steerable mobile systems, turning units, explosion proof steelwork and much more.
- >> **Automated handling systems** – Streamline production lines and assembly areas with fully bespoke handling solutions designed to increase workplace efficiencies and cut costs.

Installation & follow up support

From placing your initial order through to final commissioning, we make the process of acquiring a new crane as simple as possible.

- >> **Project management** – Our team of expert engineers can take care of the installation of the jib crane at your premises and carry out final testing to guarantee the system is ready for use.
- >> **Operator training** – We provide comprehensive training courses to teach your staff how to operate the crane safely.
- >> **Thorough examinations** – Pelloby offer ongoing support including maintenance contracts and LEAA recommended annual safety inspections to guarantee the upkeep of your lifting equipment.
