Ace Infoway puts Customers First and Unveils a User-Friendly Redesigned Website

Developed in just 46 days, Ace Infoway knows how to push its boundaries and deliver the best!

Ace Infoway, one of the best Web and Mobile Application Development Company, announced the launch of its newly redesigned website. Developed in 46 working days only, the site now features a cleaner and more user-friendly design. The redesign includes thoughtful aesthetic enrichments to provide a more engaging user experience and enhanced navigation that is a great help for the visitors to access information.

"**The launch of our redesigned website is the representation of our new look, our commitment, our teamwork and our strong desire to grow as a company together.** We treat our clients like our Partners, relentlessly working towards a common goal of achieving success and delivering seamless excellence. We have made sure to reflect the same on our website," noted **Vipul Shah, Sr. VP - Operations & Client Engagement** at Ace Infoway. "We want our website to mirror our 2020 speed mantra to Focus, Accelerate and Push Limits to Take more Leaps."

The website features a host of new technologies incorporated to give a seamless user experience. Built with the latest **HTML5**, compact with Semantic Tags, Modularize HTML and CSS3, the website UI is user-friendly and behaves like a progressive web application.

Along with this, a new image format, **WebP** is used to build the site that provides superior lossless and lossy compression for images on the web. There is considerable use of **SVG images (Scalable Vector Graphics)** and Lazysizes, making it a more SEO friendly website.

Curious to know what they can do for you? Check out the **Services** section - they have made a notable difference to their client's business and it will be easy to replicate it for you.

Know about their client engagement and see the real-world examples and **Case Studies** of completed projects that outline the value created.

Up-to-date industry-relevant curated **Blogs** section by the industry experts, researchers and writers share their views that guide the customer through the trends and decision making.
