

Q. Why do I need to wait for 2 weeks before I have a further treatment?

A. It takes between 4 - 14 days for your fibroblast cells to lay down new collagen. At day 14 we can stimulate the whole repairing and restructuring process again.

Q. How does COMCIT™ work?

A. The four modes of action: Freeze Therapy, Oxygen, Microchannelling and Skin Infusion work simultaneously, and in harmony, to encourage your skin to naturally repair itself by increasing collagen production. Your skin is left beautifully hydrated, with an instant firming and plumping effect.

Q. Is it safe?

A. Yes, **COMCIT™** is an extremely safe treatment.

Q. Does it hurt?

A. Due to the Freeze Therapy element of the treatment and the Freezing Oxygen used the treatment is pain free.

Q. How will I look after treatment?

A. Immediately after your **COMCIT™** treatment your skin will look a little pink. This will start to subside after 1 to 2 hours.

Q. Do I need to use any specific products in between treatments?

A. It is important that you use the selected home care products. We have ensured that the active ingredients not only protect your skin during the treatment course but also contain a vast array of complex ingredients that can enhance the results of your treatment.

Q. Can I wear Make-up after treatment?

A. Yes as long as it is a specialised mineral makeup. Your Skincare Professional will be able to advise you on this.

Q. Can COMCIT™ be performed on any skin type and colour?

A. Since **COMCIT™** does not use thermal heat (unlike IPL & Lasers) it is safe to use on all skin types and all skin colours. There is no risk of post-inflammatory hyper-pigmentation.

Q. How much does the treatment cost?

A. Your Skincare Professional will discuss a treatment plan and cost with you based upon your needs.

Our **Cell To Cell Talking™** Infusion Serum and daily moisturiser with SPF contains Hyaluronic acid, Vitamin C and an ingredient called DermCom. Based on Crocus Chrysanthus bulb extract this active ingredient stimulates revolutionary 'Cell to Cell Communication'.

Home Care Products

- **Cell To Cell Talking™** Soothing Cleansing Gel – Use morning and evening for a beautifully cleansed skin.
- **Cell To Cell Talking™** Infusion Spritz - After cleansing, spritz the skin and allow to dry for 60 seconds before applying Cellular Moisturiser.
- **Cell To Cell Talking™** Cellular Moisturiser with SPF - Apply morning and evening.

Regain your youth with COMCIT™

COMCIT™ is: Cryo Oxygen Microchannelling Collagen Induction Therapy. It offers the simultaneous delivery of Cryo Oxygen whilst our unique Microchannelling Roller creates hundreds of microscopic channels in the skin's papillary dermal layer, allowing the topical infusion of powerful skin rejuvenation ingredients to be driven into the skin.

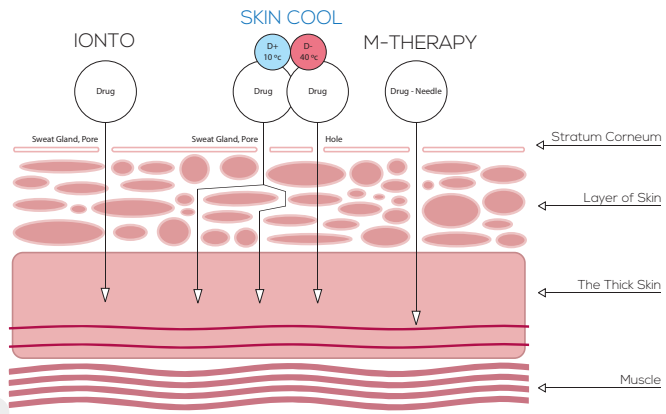

COMCIT™ employs a revolutionary Cryo-Probe to rapidly chill the skin whilst at the same time our Microchannelling Roller is painlessly moved over the surface of your skin to penetrate through the epidermis, creating a pathway for the powerful rejuvenation actives to take effect – working from the inside out and resulting in:

Instantly smooth, fresh, firmer, plumper and more youthful skin.

- Reduced lines and wrinkles.
- Tauter, more rejuvenated skin.
- A significant energy boost.
- Promotion of new skin and collagen growth.

During your treatment our **Cell To Cell Talking™ Cellular Infusion Solution** is driven into the skin through the **Microchannelling Roller** to the layer where ageing begins.

Transdermal Delivery Route

The active ingredients contain Vitamin C, Hyaluronic acid and Argan Stem Cell extract (Argania Spinosa Callus Culture) - based on stem cells of the Argan Tree. It is the very first active ingredient capable of both protecting and vitalising human dermal stem cells. This proactive extract will not only help to accelerate the skin's natural repair process but also fight skin ageing right at the root. In addition to vitalising and protecting dermal stem cells, it reduces the appearance of wrinkles, tightens and tones skin tissue, increases skin firmness and density and offers deep-seated rejuvenation of the skin.

Clinical studies performed showed that PhytoCellTec™ Argan:

- Effectively stimulates the regeneration of dermal connective tissue, thereby increasing skin density.
- Helps the skin to regain its firmness.
- Significantly reduces wrinkle depth in the crow's feet area.

COMCIT™ acts radically on marked and fatigued skin which immediately regains firmness, tone and radiance.

Q. What skin concerns can COMCIT™ treat?

- Helps firm ageing lax skin.
- Smooths and plumps lines and wrinkles.
- Helps repair sun-damaged skin.
- Perfect for acne-prone skin (due to the anti-bacterial effects of both oxygen and the infusion).
- Allows deep penetration of active skincare ingredients into the skin layers. This increases the volume of the bio-matrix of the skin, thereby plumping and smoothing lines and wrinkles.
- Allows for a more hydrated skin.
- Provides oxygen to all levels of the skin.
- Stimulates collagen production at a cellular level.
- Helps smooth stretch marks and acne scarring.
- Works on areas of skin laxity on the body such as upper arms, tops of thighs, décolletage. It is especially beneficial treating the orange peel effect on tops of arms and thighs.

During your course of **COMCIT™** you can return to your normal lifestyle immediately, with no down time or interruption to your daily routine.

Q. How long does it take to see the results?

A. Results are immediate. Due to the simultaneous action of four skin rejuvenation technologies, you will notice the difference after your very first treatment. Your skin will be beautifully plumped and feel firmer. The result will get better and better as new Collagen production is kick-started around day 14. For a total rejuvenated skin we recommend a course of 6 treatments, taken 2 weeks apart.
