

# Frequently Asked Questions

**Q** Is Threading better than other methods?

**A** Threading has stood the test of time mainly because of its technique. It's totally Natural, Gentle on the skin, Safe, very straightforward, and much Healthier than other techniques because it uses no chemicals or lasers.

**Q** My Skin is quite delicate, will this prevent me from using Threading?

**A** No, another good feature of Threading is that it's suitable for any type of skin, especially if you're sensitive to Laser, Waxing, etc.

**Q** What type of materials do you use?

**A** Just a length of sterilized Cotton or Silk, that's it !

**Q** Why is Threading relatively unknown and not available in many places?

**A** The ancient art of Threading has been practised for centuries in areas such as Persia, Egypt, & Turkey, and is only now becoming very popular over here. As it's a skilled technique learnt over time, finding an experienced specialist is not easy.

**Q** How long does it take for the hair to come back ?

**A** It can vary for different individuals, but usually between three to six weeks. Also, after a few sessions, hair re-growth becomes much finer.

**Q** Can I have it done on any part of my body?

**A** Yes but it's advisable to have it done only on the face for two reasons:-

- 1) The process can take some time to do, so it's more economical to limit it to the face.
- 2) As the skin on the face is more sensitive, it needs more care than other parts of the body.

**Q** Does Threading hurt?

**A** NO – however, seeking a **highly skilled & experienced Threading Specialist** is advisable. For people with very sensitive skin, the face might blush a little in some areas during the first treatment but soon disappears after just a couple of sessions.

| <b>Q</b> Are there any side affects?   | <b>A</b> Because Threading uses no chemicals there is no risk of rashes, stains, or allergic reactions as with other treatments which is why Dermatologists & Cosmologists recommend Threading as a better option.   |
| <b>Q</b> What about any skin irritation?   | <b>A</b> Again, it really depends on the individual's skin pigmentation. If you think you have very sensitive skin you can always try a <b>FREE</b> Patch Test with us to give you peace of mind. However, for women with severe skin allergies, we recommend you consult with your Doctor before beginning any treatment. |
| <b>Q</b> How long will it take for Full Face session?  | <b>A</b> Usually 30 - 45 mins.   |
| <b>Q</b> Can I use your <u><a href="#">Sense</a></u> Beauty Skin Care protection products with your treatment? | <b>A</b> Of Course, to find out more please go to our website <u><a href="http://www.exeterthreading.co.uk/skin-care.html">http://www.exeterthreading.co.uk/skin-care.html</a></u> page.   |
| <b>Q</b> How can I find out about making an appointment?   | <b>A</b> Please go to our website <u><a href="#">Contact Us</a></u> page for further details.  |
