Here are normal types of Repair and Maintenance for Corporate Office

- ☐ Performing routine building Repair and Maintenance Work
- ☐ Maintenance of Electrical Installations
- ☐ Preventive Maintenance
- ☐ Protective Maintenance

Performing routine building Repair and Maintenance Work

- ❑ In order to maintain an attractive appearance, maintain a safe environment condition, and serve their intended purposes, facilities must be properly maintained. Building repair technicians conduct periodic inspections to determine which areas need attention and then perform the necessary repairs.
- ❑ Maintenance Workers might change the filters in the air conditioning systems, replace burnt-out light bulbs, or replace damaged floorboards, lubricating squeaky hinges, during basic building Repair and Maintenance Work.
- ❑ The maintenance worker in an industrial setting might follow a set schedule of routine maintenance procedure for machinery and equipment such as a lubricating bearings and changing hydraulic fluids.

Maintenance of Electrical Installations

By getting it installed and maintained by licensed individuals, an electrical installation is remain safe. Periodic inspections are necessary, and the proper record of a work is maintained. The recommended interval for begins at:

- ☐ Earthing tests – Once a year
- ☐ Insulation – Tested Twice a year
- ☐ Polarity – Once every five years.

Preventive Maintenance

Regular maintenance surveys ensure the performance of preventive maintenance to prevent breakdowns of machinery and occurrence of maintenance problems in buildings and services. Preventive maintenance is conducted on a regular inspection basis.

Our Repair and Maintenance for Corporate Office services make sure that building parts are protected from water damages, mildews, insect attacks, overuse, accidental damages and other may more issues.
