UsVox, Inc. is a telecommunications and VoIP service provider headquartered in Miami, Florida. Founded in 2009, the company delivers cloud-based communication solutions designed to help businesses manage voice, messaging, and customer interactions efficiently.

Business Communication Services

- Hosted PBX phone systems – cloud-based phone systems for managing extensions, call routing, voicemail, and advanced features.
- SIP trunking services – reliable VoIP connectivity for business phone systems.
- Business phone numbers (DIDs) – local and international numbers for departments, employees, or applications.
- SMS and messaging services – send and receive business text messages with customers.
- Virtual fax services – send and receive faxes digitally without traditional fax machines.
- CRM integrations – connect phone systems with CRM platforms to improve workflow and communication.
- AI-powered communication integrations – automate call handling and enhance customer interactions.
- Business phone system management – centralized tools to configure users, call routing, voicemail, and messaging.

Customer Support

Technical support is available 24 hours a day, 365 days a year. Customers can contact support by phone or email at any time or visit our support portal:
